

SafeSeaNet Workshop 21

SSN Roadmap

Agenda item 21.4.5

Philippe Duchesne
Vessel Traffic and Reporting Services

Lisbon | 8 May 2014

SSN v2.08

- Element **CargoManifest** not mandatory in PortPlus notifications, as in XMLRG 2.07
- ETA non mandatory in **ship AIS notification**
- Archiving of Ship Call data: first step
- Integration of EMSA **identification management system**: single login for all EMSA applications

Planning

- Deployment on production **end of June (week 26)**

SSN v3.0

- Changes derived from the **Reporting Formalities Directive** 2010/65/EU
 - Revised PortPlus message
 - Changes to ShipCall request/response
 - New exemption notification
- Changes to the **MRS messages**
 - Revised Ship notification and request/response
- **Phase out** of Port and Hazmat request/response and of Security notification
- **Additional changes** as per defined list of RFC

SSN v3.0 - Deletion of data groups

- Possibility of deleting previously reported Hamzat, Security and Waste data groups in an update PortPlus notification
- Proposed alternative solution is to add specific attributes in the **NotificationStatus** element

MS2SSN_PortPlus_Not – Elements				Attributes	Occ
Header					1
