The Corrective Action Plan.

EU member states, Iceland and Norway to prepare, undergo and explore areas of technical support that could be provided to the overall performance of the Icelandic maritime administration could be improved. This was an opportunity to identify areas where the overall performance to establish a task force on digitalisation and the effect on the kind of equipment available to member states when dealing with the kind of equipment available to member states when dealing with operations related to pollution response.

AWARENESS-RAISING FOR THE UPCOMING 0.50% CAP ON SULPHUR IN MARINE FUEL

EMSA has concluded an improvement project on board the vessel Galaxy Eco, based in Varna (Bulgaria), comprising the installation of a dispersant spraying system and the setting up of an associated dispersant stock.

EMSA ENHANCES POLLUTION RESPONSE CAPACITY IN THE BLACK SEA

The conference on spill prevention, preparedness and response to oil spills in Croatia, featured several high-level speakers who shared their knowledge and expertise on the subject. The conference provided a platform for the exchange of ideas and the development of best practices in the field of oil spill response. It also included technical sessions on various aspects of oil spill response, such as vessel preparedness, emergency planning, and interagency cooperation for response to oil spill incidents.

EU CIVIL PROTECTION EXERCISE CARRIED OUT IN EASTERN HUNGARY

The exercise was specifically geared towards preparing interagency teams and coordinating efforts to respond to accidental oil spills in the Black Sea. EMSA was involved in the pollution response efforts by coordinating and supporting the oil spill recovery operations. The exercise aimed at improving the national and regional preparedness and response capacity to accidental oil spills in the region and to contribute to the establishment of a regional spill response network. It also included capacity building activities, such as training exercises and simulations, to enhance the preparedness and response capacity of the participating countries.

EUROPEAN COMMUNITY SHIPOWNERS’ ASSOCIATIONS GATHER AT EMSA

IMO MEMBER STATES AUDIT SCHEME IN ICELAND

The conference on spill prevention, preparedness and response took place in Split, Croatia, on 20-27 May. It was hosted by the Croatian Government and co-organised by the European Maritime and Port Authority (EMPA), the Regional Maritime Committee of the Mediterranean (RMC) and the Ministry of Maritime Affairs and the Environment of Croatia. The conference focused on spill prevention, preparedness and response in the Adriatic Sea, with a particular emphasis on the role of the European Maritime and Port Authority (EMPA) in supporting national maritime authorities and industry in the region. It included technical sessions on various aspects of oil spill response, such as vessel preparedness, emergency planning, and interagency cooperation for response to oil spill incidents.
