

SSN Group meeting 23

HAZMAT WG – progress report

Agenda item 23.3.2

Charles Abela / **Senior Project Officer**
Department C: Operations/Unit C.2.2

Lisbon / 6 May 2015

- **High Level Steering Group (HLSG) 9 agreed to establish a HWG to develop and propose measures for improving the reporting of Hazmat in SafeSeaNet.**
- **HWG delivered**
 - Guidelines on reporting HAZMAT information
 - Requirements for a common HAZMAT Reference Database (CHRD)
- **Documents were approved by SSN Group 22 and subsequently validated by the HLSG 12**

- **SSN Group 22 agreed that the HWG should continue to function but with revised terms of reference.**
- **It identified a number of areas which should be included as future work for the HWG.**
- **HLSG 12 concurred with this view and approved new terms of reference.**

- **Tasks completed**

- Definition of a HAZMATID for its use in CHRD (voluntary for MS)
- alignment of the HAZMAT Guidelines and the SSN XML Reference Guidelines

- **Tasks on-going**

- define the content of a leaflet on HAZMAT reporting – draft text agreed
- establish a training module on reporting HAZMAT in SSN – draft proposal being prepared by EMSA
- keep under review the Guidelines on Hazmat Reporting in SafeSeaNet
- consider any other HAZMAT related issue (e.g. reporting of bunkers onboard, general arrangement plans in SSN and location on board - proposed by BE at SSN 22)

Member States are invited to:

- Validate the proposed composition of the HAZMATID for its use in the CHRD
- Validate the non-technical amendments to the XMLRG 3.02, contained in Part 1 of Annex II
- Note the amendments which have a technical impact on the SSN system (Part 2 of Annex II)
