

Meeting: 24th SafeSeaNet Group Meeting

Place and date: Lisbon, 14 October 2015

Agenda item: SSN V3 Status

Document number: SSN 24.5.1

Submitted by EMSA

Summary	This document presents the current status of the commissioning tests and the implementation of SSN V3 by Member States (MSs).
Action to be taken	As per paragraph 3
Related documents	HLSG 13, Agenda point 3.2.

1. Background

On 8 April 2015, a new version of SafeSeaNet (SSN V3) went live in order to accommodate changes stemming from the Reporting Formalities Directive.

Between April and June 2015, there was a transitional period within which the central SSN system supported the exchange of information in line with two different SSN versions (V2 and V3). After the deployment of SSN V3, MSs asked the SSN HLSG to extend the transitional period on the basis that it should be kept as short as possible. The group noted the request, and agreed that the transition period should continue until the next HLSG meeting (scheduled for December 2015) where the issue will be evaluated again.

2. Current Status

The information shown in the tables below was prepared in week 38, so as the information is dynamic in nature, some may be outdated at the time of the SSN 24 group meeting.

a. Commissioning tests plan

Member State	Commissioning tests performed	Comments

Netherlands	Yes	Security and Waste not provided.
Norway	Yes	
Poland	Yes	
Portugal	No	
Romania	No	
Slovenia	No	
Spain	Yes	
Sweden	No	
United Kingdom	No	

3. Action Required

Member States are invited to note the above information, and to provide feedback should there be any changes in the information presented at the time of the meeting. It should be noted that the status of SSN V3 (i.e. Commissioning tests and entering in production) will be presented at the next HLSSG meeting (December 2015).
