

ITALIAN COAST GUARD HEADQUARTERS

THE MARITIME SURVEILLANCE WITH L.R.I.T.

CAPTAIN LEOPOLDO MANNA

WARRANT OFFICER WALTER CONTI

4th LRIT NCA Meeting, Lisbon may 3rd 2011

ITALIAN COAST GUARD
HEADQUARTERS

AGENDA

SOME REAL LIFE EXAMPLES ON LRIT

APPLICATION:

1. LIBYAN SCENARIO:

- SUPPORT TO PEOPLE EVACUATION OPERATIONS BY MONITORING SHIPS TO BE DIVERTED TOWARDS LIBYAN PORTS;
- ASSO 22 HIJACKED BY LIBYAN SOLDIERS.

2. SAR EVENT ON 24/7/2010:

- MAN OVERBOARD FROM AN ITALIAN SAILING BOAT.

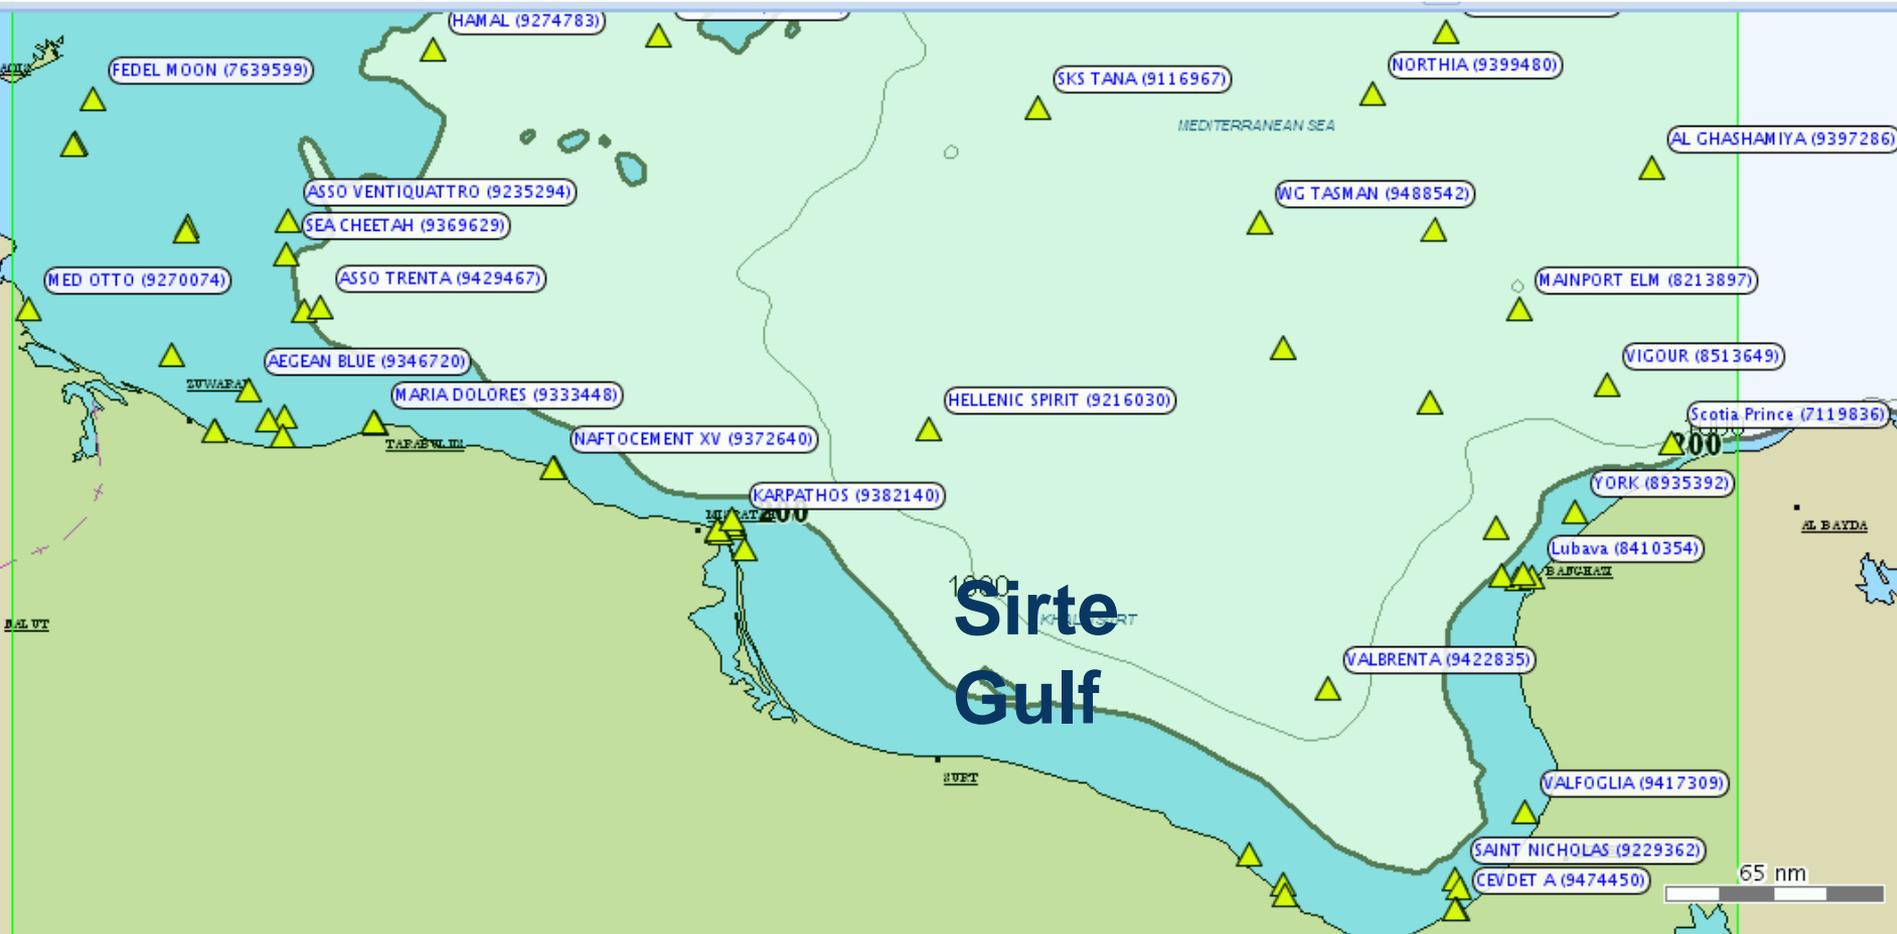

3. LRIT IN SUPPORT OF ANTI-PIRACY OPERATIONS:

- TANKER SAVINA CAYLYN;
- TANKER ALESSANDRA BOTTIGLIERI;
- TANKER ROSALIA D'AMATO;

4. COLLABORATION WITH JRC (PMAR PROJECT) AND WITH E-GEOS (MARISS AND G-MOSAIC PROJECTS).

LIBYAN WATERS SCENARIO: TRAFFIC MONITORING TO SUPPORT DECISIONS IN PEOPLE EVACUATION OPERATIONS

Detected ships with the aim to find any useful platform to divert to LIBYA for immediate evacuation of italian and foreign citizens.

ITALIAN SHIPS ALREADY BERTHED INSIDE LIBYAN PORTS ON March 1 2011

ITALIAN TUG "ASSO 22": HIJACKED BY LIBYAN SOLDIERS

THE POSITION OF THE
ITALIAN TUG ASSO 22
HAS BEEN
CONTINUOUSLY
MONITORED AFTER THE
HIJACKING. NO
COMMUNICATIONS WERE
POSSIBLE.

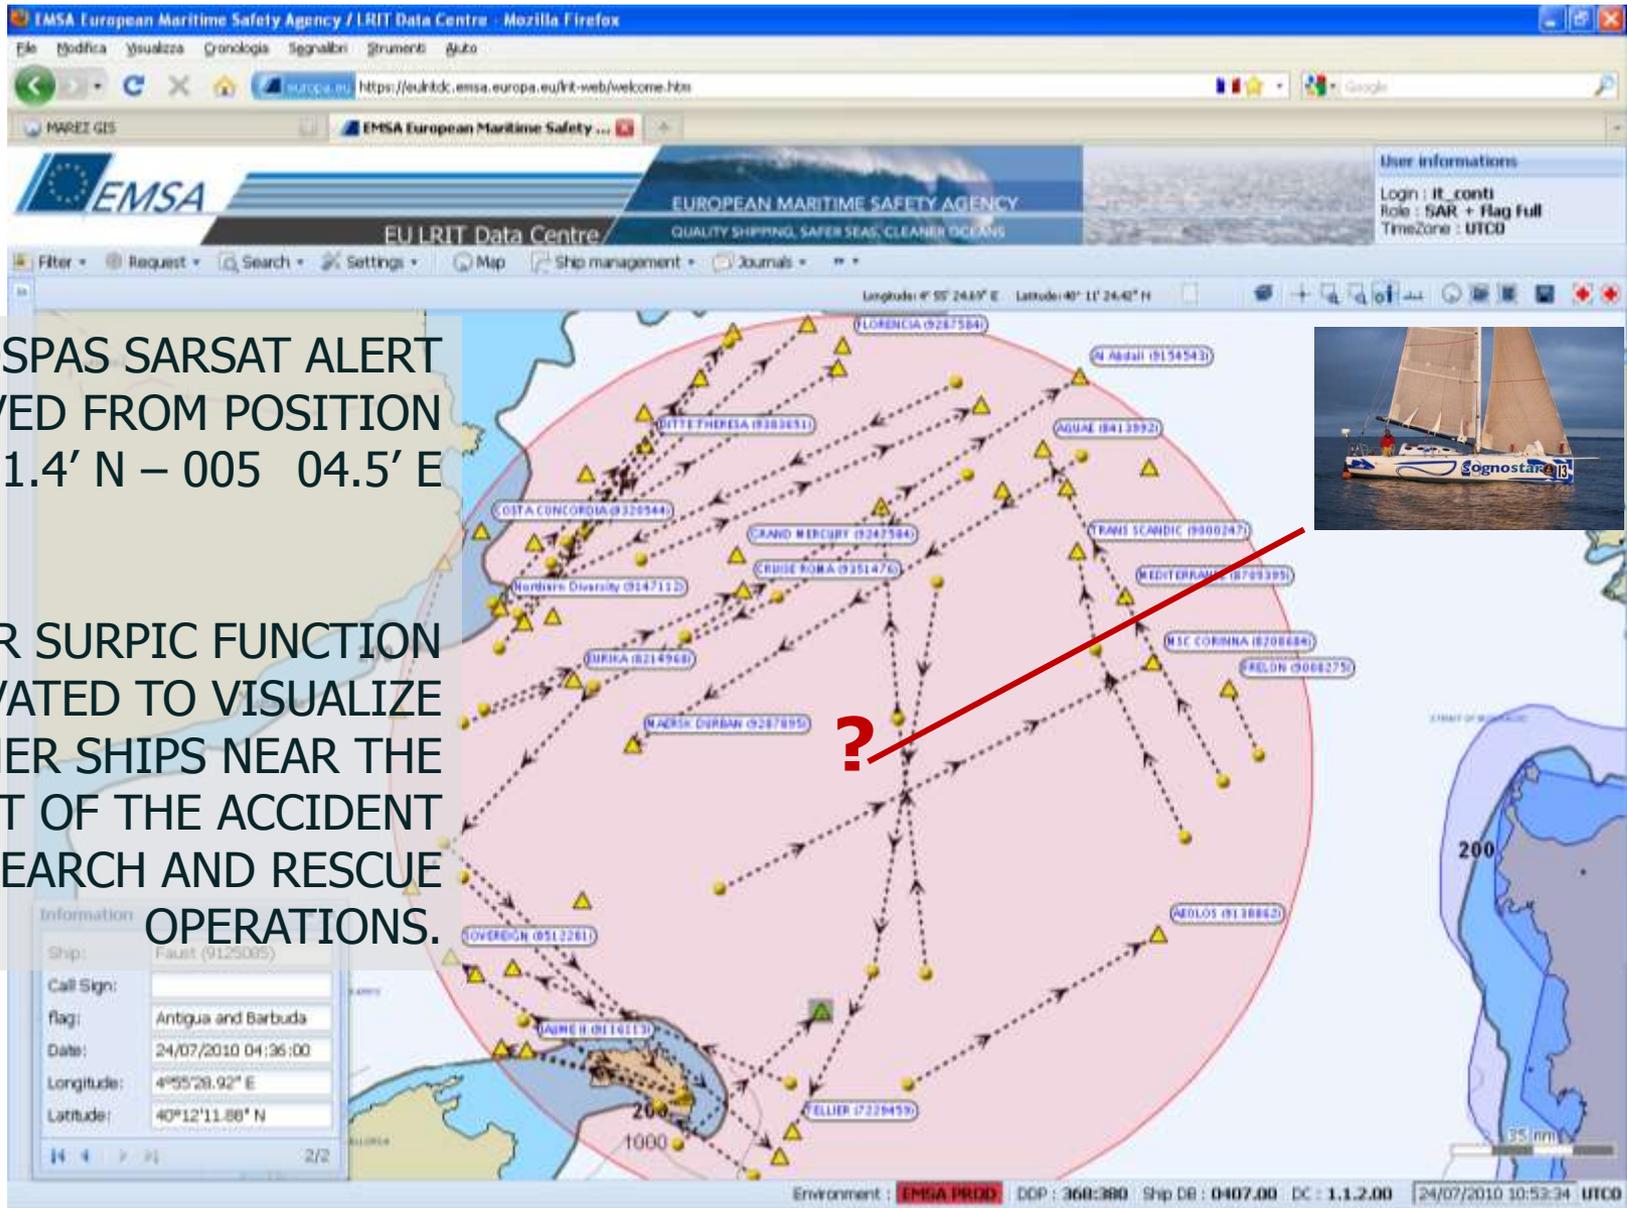

ITALIAN TUG "ASSO 22": HIJACKED BY LIBYAN SOLDIERS

SAR CASE ON 24/7/2010:

MAN OVER BOARD FROM AN ITALIAN SAYLING BOAT

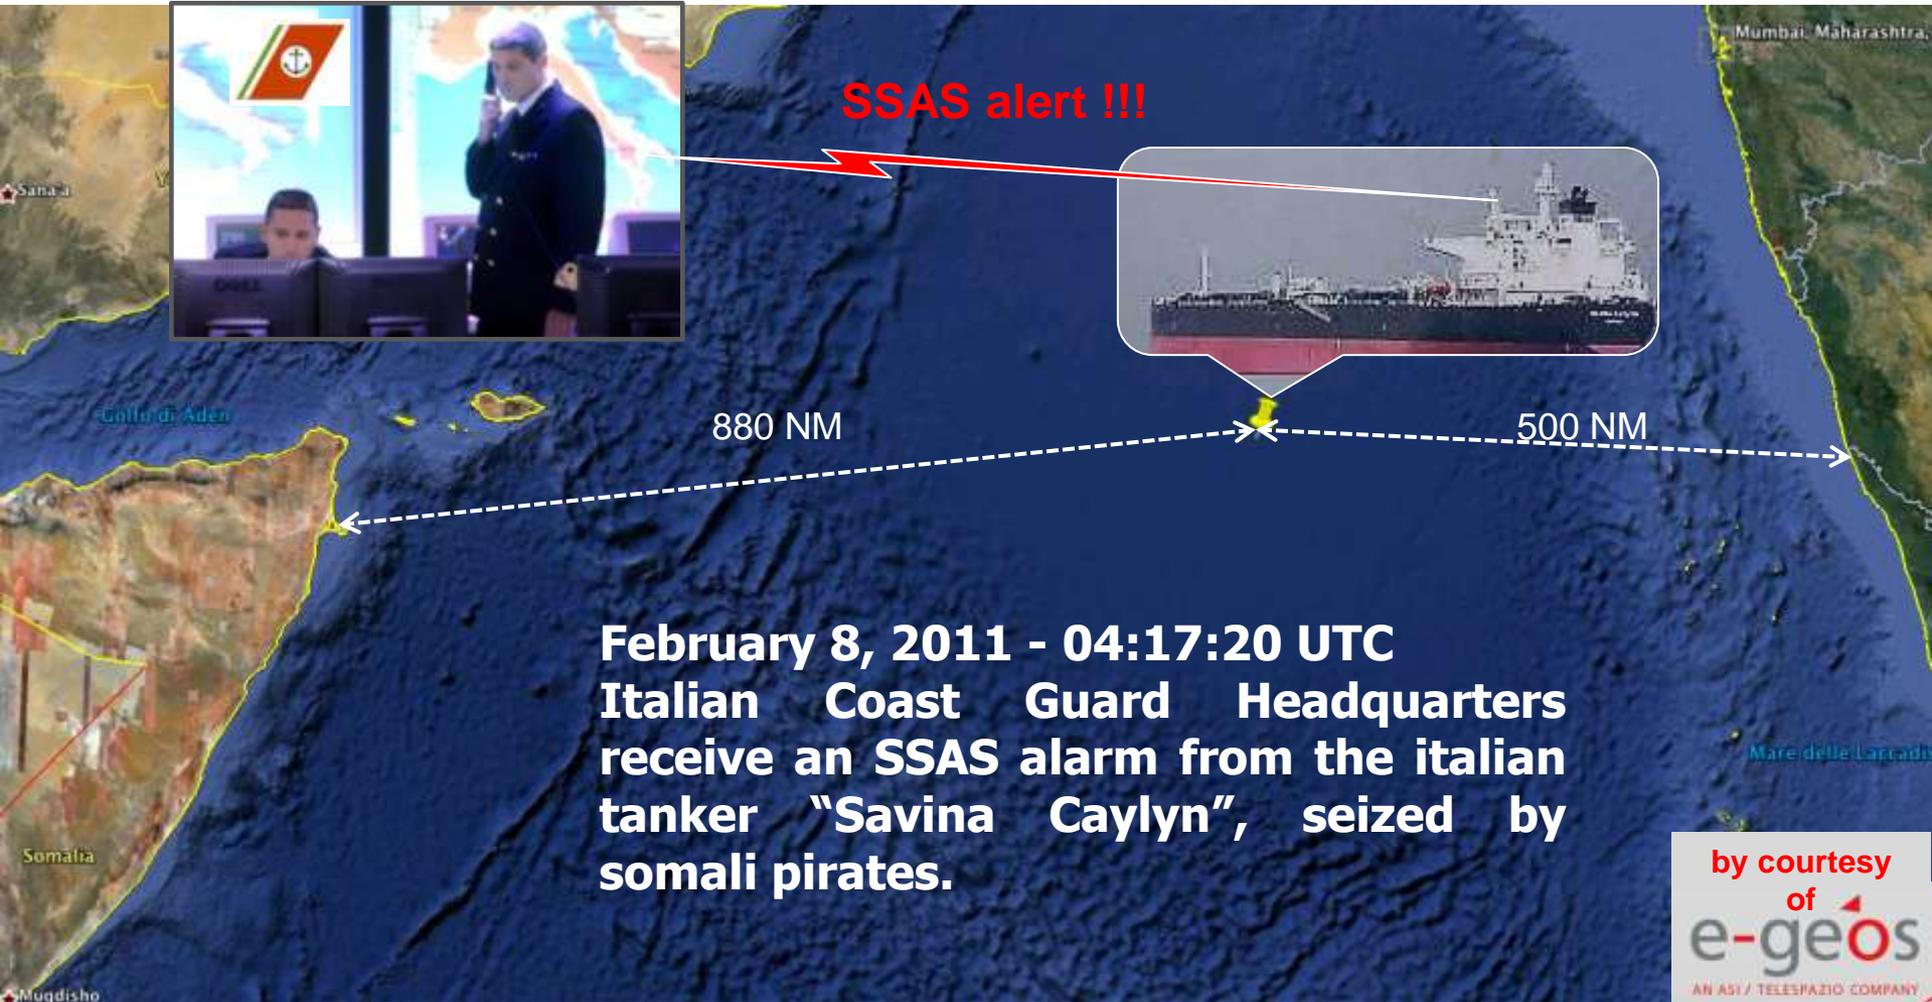

COSPAS SARSAT ALERT
RECEIVED FROM POSITION
41 01.4' N – 005 04.5' E

SAR SURPIC FUNCTION
ACTIVATED TO VISUALIZE
OTHER SHIPS NEAR THE
POINT OF THE ACCIDENT
FOR SEARCH AND RESCUE
OPERATIONS.

2011 February 8 – 04:17 UTC

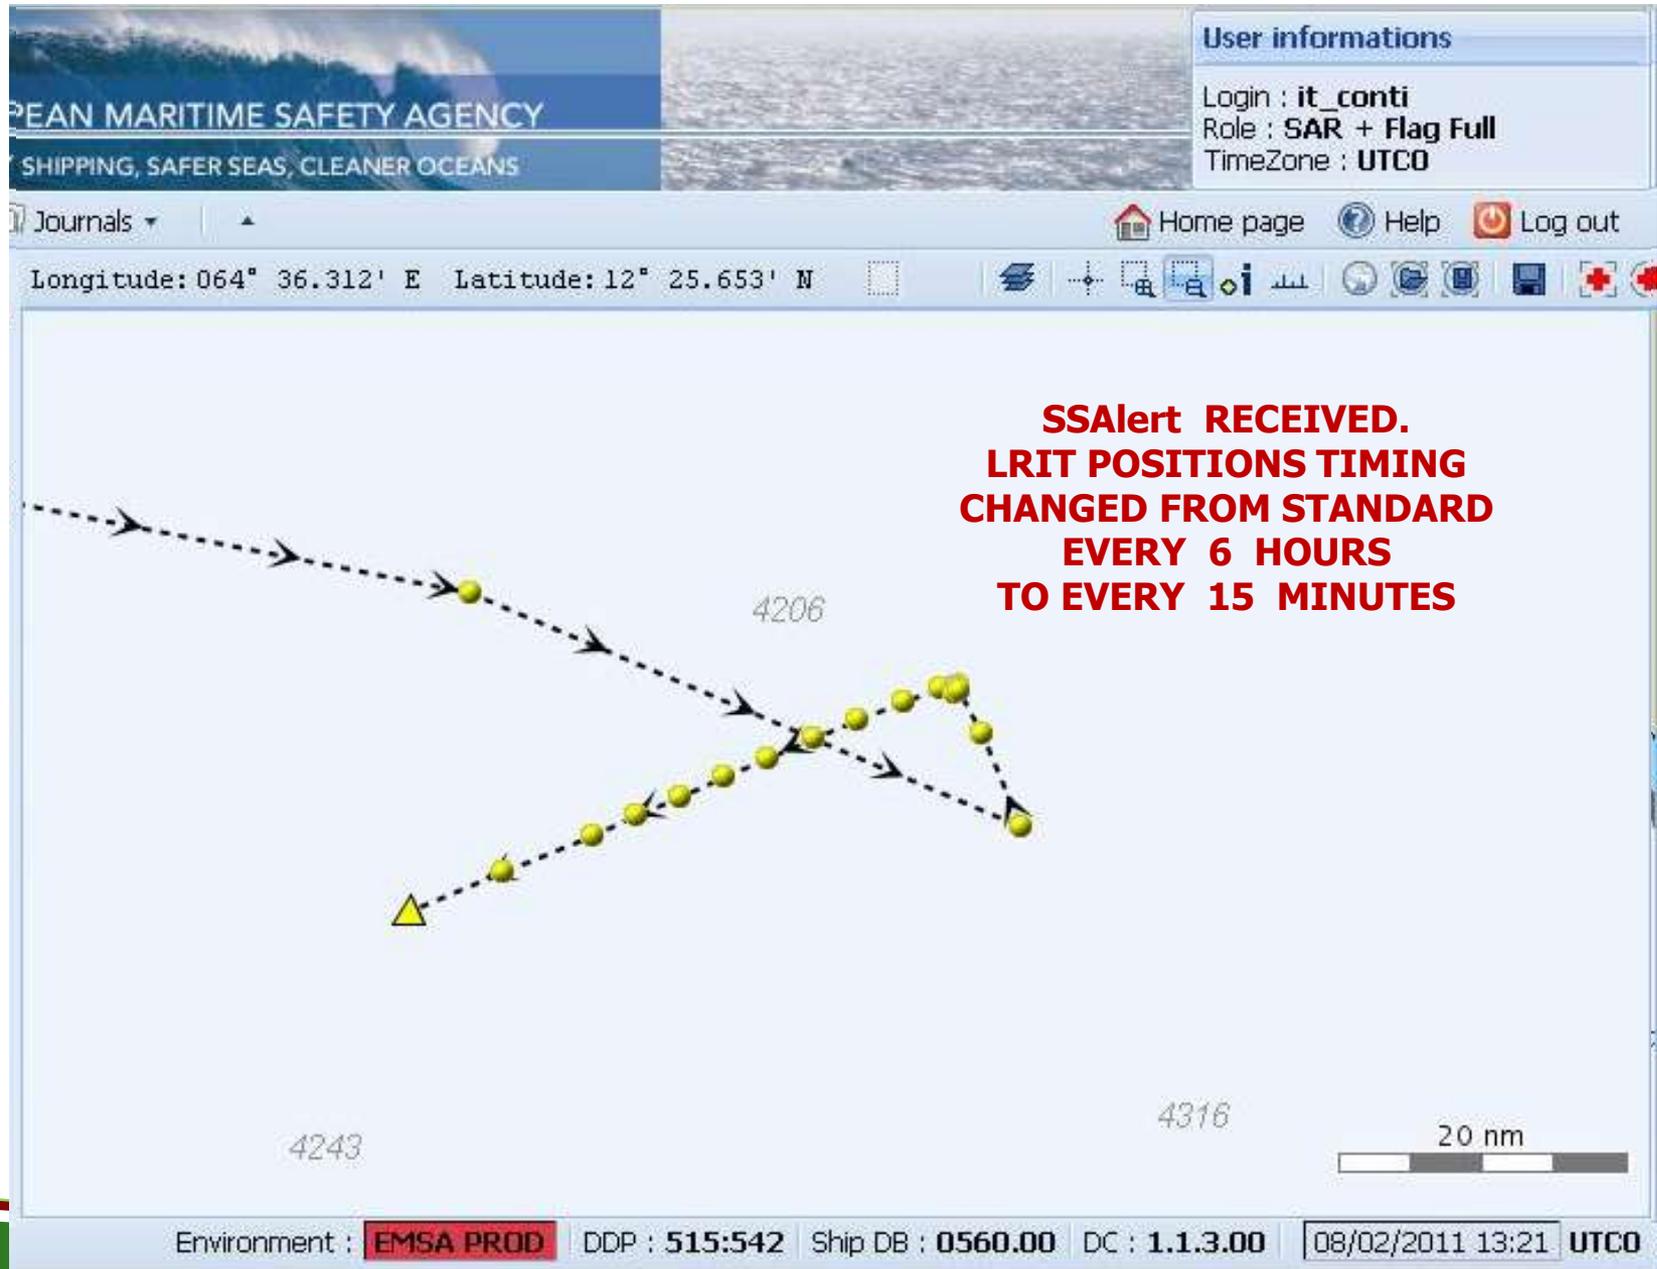

ITALIAN FLAG SHIPS UNDER PIRACY ATTACK

EXTENDED TRACKING SERVICE ON INDIAN OCEAN AREA FOR MONITORING OF TANKER SAVINA KAYLYN

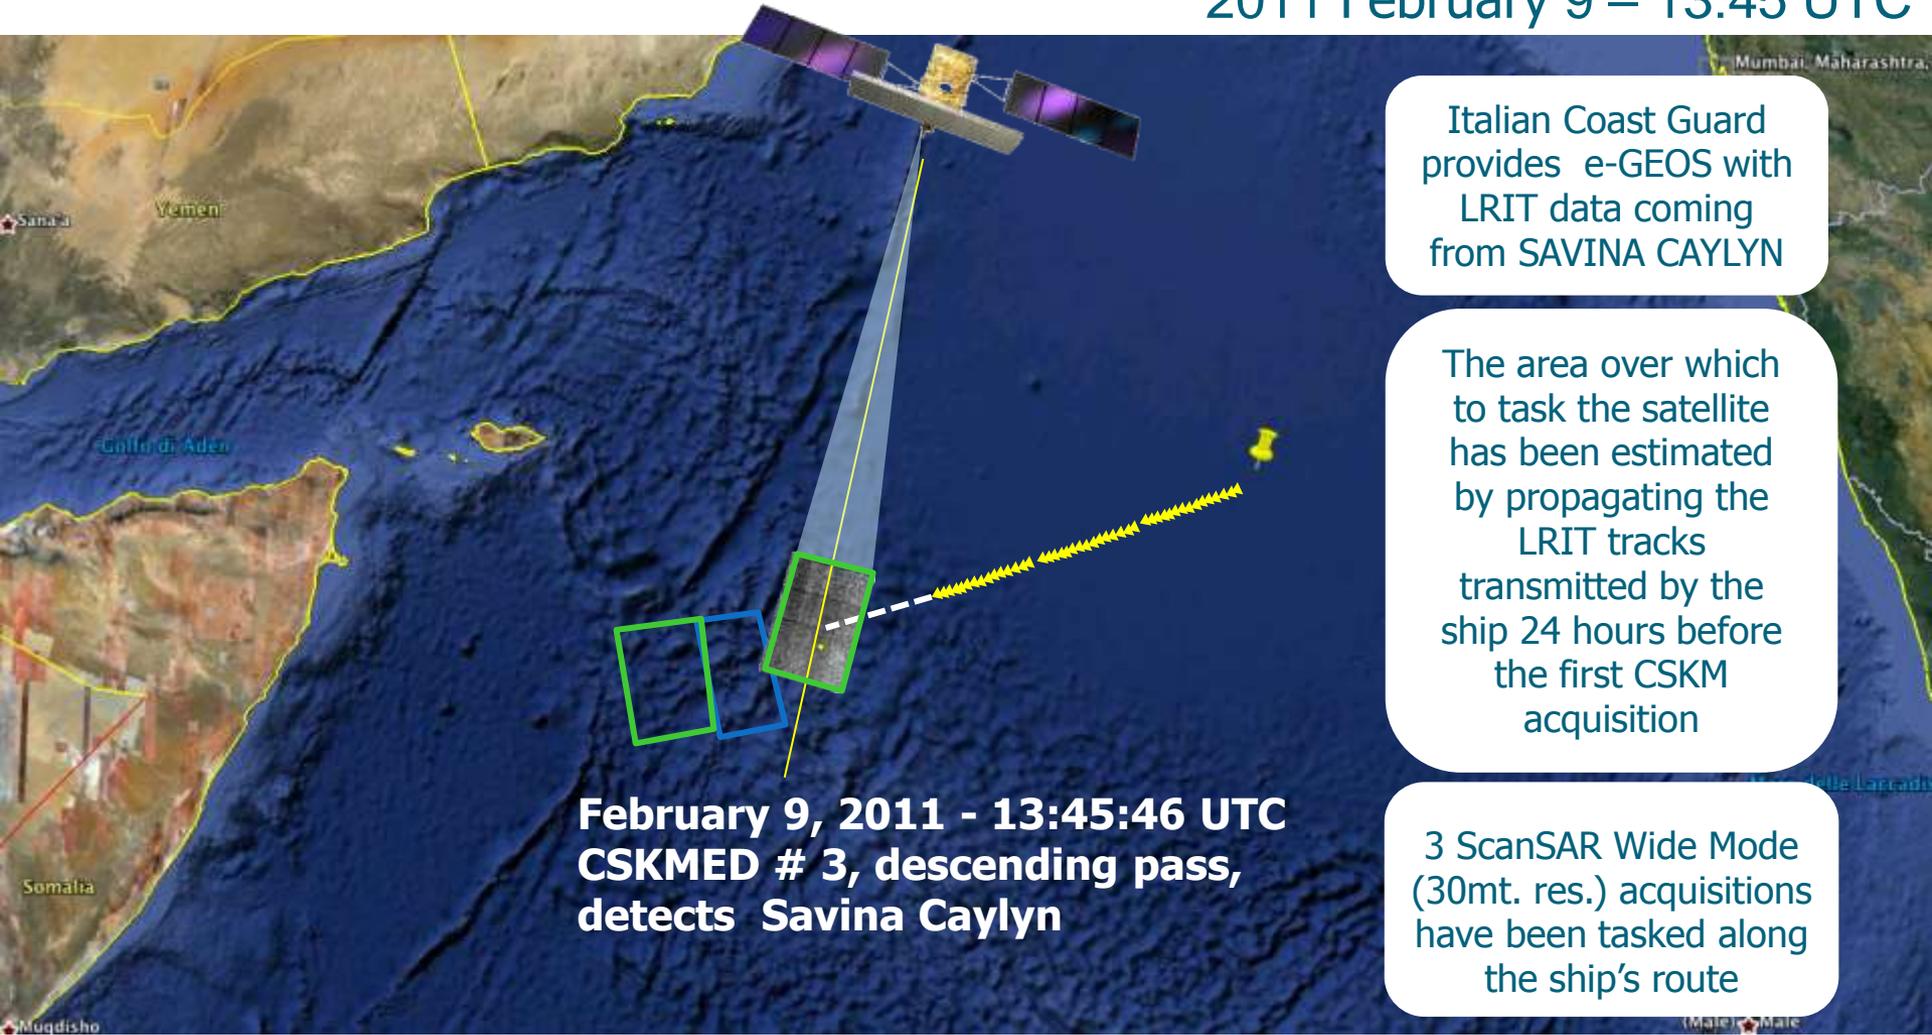

- Service activated by Italian Coast Guard on 08-02-2011 at 10:00 UTC.
- At that time Italian Coast Guard starts to provide e-GEOS with LRIT data coming from SAVINA CAYLYN.
- By applying appropriate calculations on to the received LRIT data, e-GEOS tasked a COSMO-SkyMed satellite imagery acquisition on the area crossed by the italian tanker. The area has been estimated by propagating in the future the LRIT tracks transmitted by the ship 24 hours before of the first CosmoSM acquisition. The CSKM images could provide important informations on the traffic around the monitored tanker.
- The first acquisitions of COSMO SkyMed sensors have been acquired on 02-09-2011 at 15:45:54. The second one on 02-10-2011 at 02:17:51. These images have been acquired in ScanSAR Wide Mode 30mt. resolution.
- On 02-13-2011 CSKM acquired the SAVINA CAYLYN in StripMAP mode 5mt. resolution.
- On 02-14-2011 optical satellite IKONOS acquired the SAVINA CAYLYN.

SAVINA TANKER MONITORED WITH LRIT

2011 February 9 – 13:45 UTC

Italian Coast Guard provides e-GEOS with LRIT data coming from SAVINA CAYLYN

The area over which to task the satellite has been estimated by propagating the LRIT tracks transmitted by the ship 24 hours before the first CSKM acquisition

3 ScanSAR Wide Mode (30mt. res.) acquisitions have been tasked along the ship's route

**February 9, 2011 - 13:45:46 UTC
CSKMED # 3, descending pass,
detects Savina Caylyn**

Activation – tanker “Rosalia D’Amato”

Event description:

- On April 22nd, 2011 the tanker Rosalia D’Amato was attacked by pirates in the Arabic Sea.

Triggering entity: **Italian Coast Guard**

- e-GEOS has been activated by the Italian Coast Guard in the framework of G-MOSAIC Rapid Geospatial Reporting Service to monitor vessel route using both optical and radar satellite images, **with the strict support of LRIT system.**
- e-GEOS immediately planned and acquired both Cosmo-SkyMed and IKONOS images along the estimated route provided by the IT Coast Guard, detecting the vessel in different positions, according to **LRIT tracks.**
