System Requirements Specifications

XML Messaging Reference Guide

Backward compatibility with v3 messages

Both v3 and v4 accepted during transition period

Several rules will be applied after transition period

Proposal to improve the commissioning tests procedure

PortPlus notification

- Includes details from waste and cargo residues notification
- Indication of waste delivered at last port
- Waste codes: 2 new, 5 deleted (deletion after transition)
- Indication whether bunkers details are available

Ship Call Request/Response

- Requests for bunkers details
- Amendments to Hazmat details
- No request for Waste details if available in Central SSN

Port facilities identification with LOCODE and 4-digits number

Exemption notification

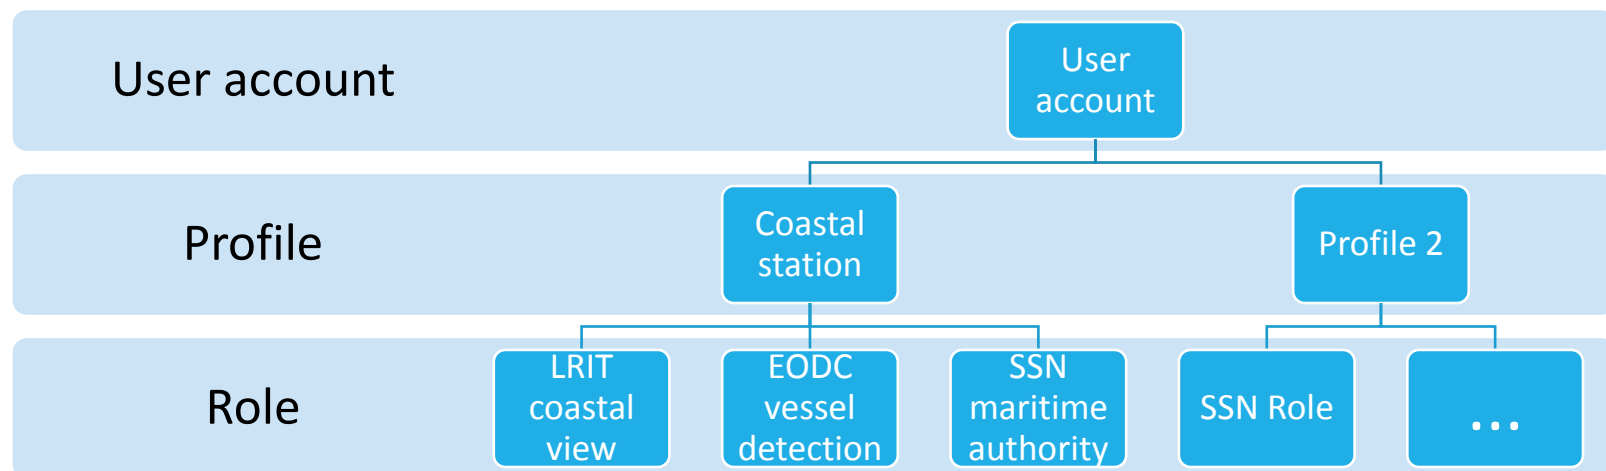

- Ports which exemption applied to (mandatory after transition)
- Port facility (in case of Security exemption)
- Waste types (in case of Waste exemption)
- Exemption for waste notification, exemption for waste delivery, exemption for waste fees

Request for exemptions

- Through R/R messages and user interface
- Granted to a ship, issues by a country, applicable in a port, of specific type, or all exemptions

For each user account

- Personal information
- Type (Person / System)
- Country / Institution
- Organisation (from COD)
- One or several Profiles

Member States are invited to

- Validate System Requirements Specifications and XML Messaging Reference Guide

System Requirements Specifications and the XML Messaging Reference Guide v4 will be approved by HLSG
