

Automated Behaviour Monitoring (ABM) Workshop 3

Long term development priorities

Lukasz Bibik – Integrated Services Design

Lisbon, 12.09.2017

Recap of the planned long-term developments

Prioritizing developments

- **ABMs and the EO data**
- **ABM based on statistical data**
- **SSN EIS data related ABMs**
- **ABMs using the AIS static data**
- **ABM based on the Satellite AIS (S-AIS) validation**
- **ABM based on ship reference database (CSD) changes**
- **ABM based on the regional servers transmitted data**

- **Detect interlinked situations**
- **ABM with historical positions data**
- **Setting ABM via Mobile App**
- **Setting ABM via S2S interface**
- **Distributing alerts via S2S**

- **Each participant allocates 3 votes/ marks for the most important developments**
- **Flipcharts will be used for that**

Expected outcome: Priorities for the developments
