

# 10.5 Feedback on use of SEG and Mobile App

## Parallel session 1

Lisbon, 19.10.2017

- Usability of SEG;
- Limitations, new use cases, requirements, usage?
- Mobile App;

- **Usability of SEG;**
  - Layout and ergonomics;
  - Performance;
  - Clustering / filtering;

## - Limitations, new use cases, requirements, usage?

- Vessel track query;
- Area centric query;
- Last position service (24 hrs)
- Extension of historical data (6 months to 1 year?)
- VDS and associated correlation;
- Integrated Ship Profile and Integrated Ship Data Sheet;
- Advanced search and filtering – what are the parameters?

## - **Mobile App;**

- SSN data (Port+ notifications)
- Smart search (from viewport to global)
- Android telephone version;
- Integration of EO images & derived products;
- Integration of STMID and Port data;
- Integration of met-ocean data;
- Development of ABM admin console App.
