

Common Information Sharing Environment (CISE)

Gianluca Luraschi

Project Officer (Department Operation)

IMS user group - 22nd May 2019

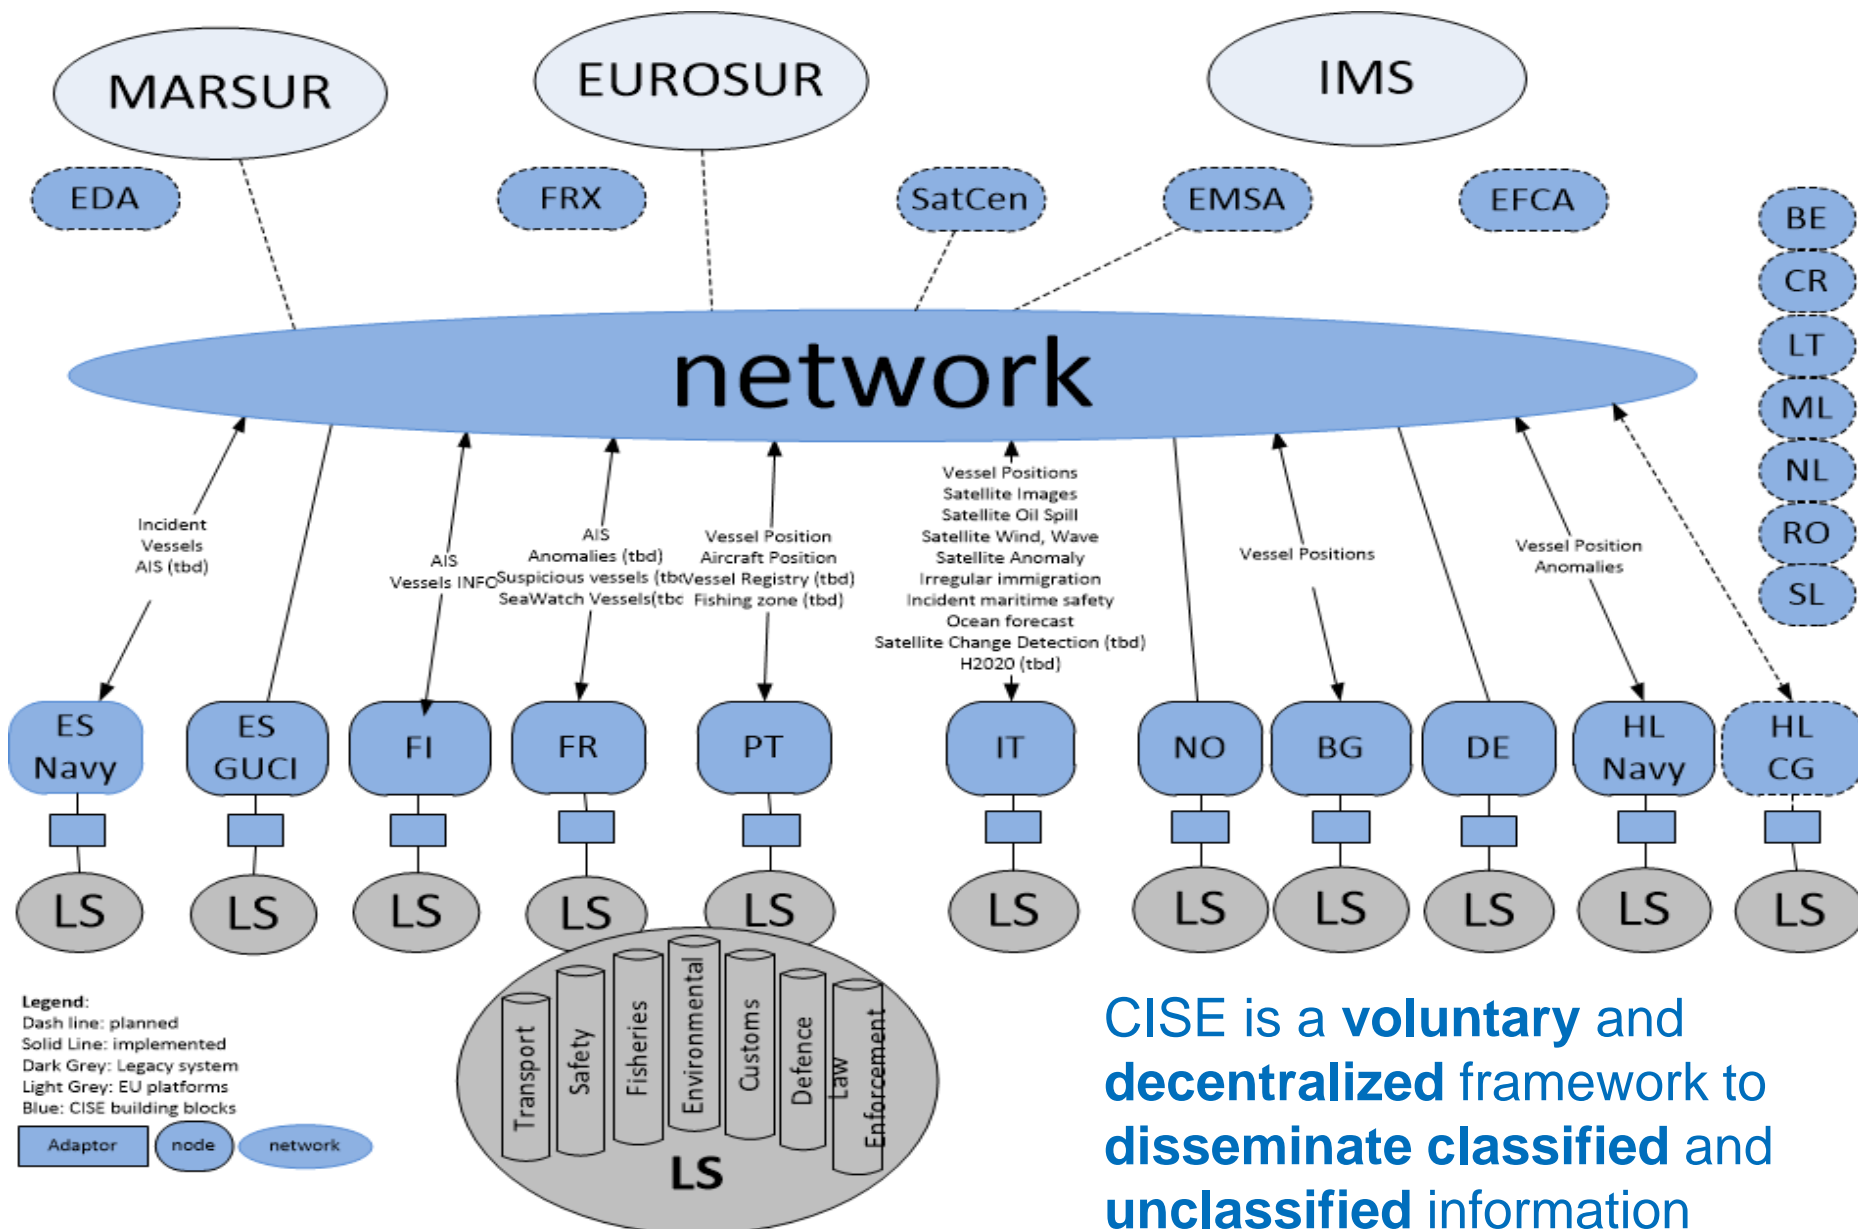

CISE is an initiative between EU maritime authorities, across sectors and borders, to:

- enhance **information sharing**;
- foster **cooperation** and to create **synergies** among the stakeholder involved;
- avoid the **duplication of data acquisition**, and to increase the **complementary of the information and services** delivered.

CISE should be seen as part of a more comprehensive information and exchange **framework across the EU**

CISE current and target architecture

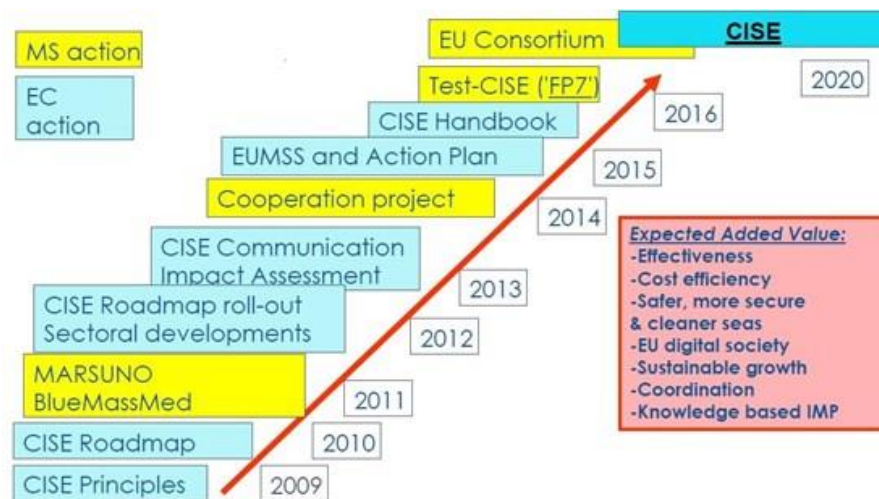

CISE is a **voluntary** and **decentralized** framework to **disseminate classified and unclassified** information

On the grounds of the EUCISE2020 FP7 project (EUCISE2020), the Commission has putted in place a **Transitional Phase** in view of the CISE Operational Phase:

- Transitional Phase started on 16th April 2019;
- Duration 2 years;

EMSA is recognized in the EU context as reliable and competent **maritime knowledge broker**.

EMSA has been tasked by the EU Commission in setting up and coordinating the Transitional Phase.

-
- The diagram illustrates the architecture of the proposed system, showing a central 'Network' component connected to three main nodes: 'Network Node A', 'Network Node B', and 'Network Node C'. Each node contains a 'DBS Access Point' and a 'DBS Access Point' (labeled as such in the diagram). The nodes are interconnected via 'Network Interface' and 'DBS Access Point' components. A red dashed line encloses the three nodes, indicating a specific network configuration.

- The **Friends of the Presidency** for the EUMSS will be kept informed (European Council body);
- The overall strategic oversight is with the **Member State Expert Sub-Group** (advisory committee chaired by DGMARE);
- The **CISE Stakeholder Group** will be entrusted with the execution of the activities (chaired by EMSA).

Conclusion

- The execution of the Transitional Phase activities is managed by the **CISE Stakeholder Group**;
- EMSA will set-up and coordinate the **technical, operational and administrative framework** during the transition phase;
- EMSA will enable the **sharing of information** and will be **fostering cooperation** within the CISE stakeholder, as envisaged by the EUMSS;
- The **CISE operational phase** will be designed based on the Transitional Phase's outcome.
