

8th SSN LRIT Group Meeting

SSN Roadmap

Agenda item 8.4.1

Philippe Duchesne / Senior Project Officer
Department 3 - Digital Services & Simplification
Unit 3.3 - Simplification

Videoconference / 21 October 2020

Since last SSN Group meeting

- XMLRG v4.02 and SSN WS v1.51 published on 22 June
- SSN v4.4 was released on 1 July
 - Improves the way voyage information is displayed in the Textual User Interface
 - Improves the integration with other EMSA systems – CSD v2, IRD
- Patch SSN v4.4.1 deployed on 19 October
 - Corrects order in voyages list in integrated ship information
 - Corrects list of waste items in ShipCall responses
 - Addresses load issue on server due to CSD notifications

Future developments

➤ Consolidation of Port Call information

- SSN based on **Voyage** concept (from port departure to port departure)
 - Obtained by correlating PortPlus notification with different ShipCallIDs
 - Aimed at coastal stations for providing information applicable to the ship when it is sailing at sea
- Proposal: introduce **Port Call** concept (information reported for same port call)
 - Obtained by consolidating PortPlus notifications with same ShipCallID
 - Aimed at e.g. port authorities and NSW. Prepares for future EMSWe.
 - At first stage, available in SSN web user interface

➤ Improvement related to Incident Reports in the web user interface

- Improvements recommended by IR Working Group that only impact the user interface
- e.g. user friendliness and navigation of SSN Textual Interface, online help, selection of recipients, searching per authority and country

Link between CLD and IMO GISIS

- Planned for last quarter 2020

Improvements of CLD and COD

- Possibility to export all information from COD (currently not all elements are visible in the export results)
- Change of the length for some attributes in order to register complete information
- Extend the number of ports that can be created under an organisation duty
- Access to CLD and COD logs in the web user interface
