

Outcome of MSC 85

4th EU LRIT Expert Group meeting
10 December 2008

Yannick Texier

Satellite Based Monitoring Services

Circ. Transitional Arrangement

(re: MSC85/WP.7/Add.2)

- Apply during 31 Dec. 2008 and 30 June 2009
- DCs should be in testing phase during the period
- Integration before 31 June 2009
- Subject to communication to IMO
 - DDP data
 - List of Authorised ASPs
- Operational DCs might set reporting rate > 6h00
- IMO publish list of CGs concerned by Transitional arrangement

How Access the DDP server

- MS should communicate to IMO Sec. well before 31 Dec. 2008
 - National Point of Contact details
 - List of Authorised ASPs
- Using model letter in Annex 5 of MSC85/WP.7/Add.1
- In return IMO provide the UserId and Password of the DDP server.
- MS Start fill out the DDP asap

Polygons

- DDP server performs limited technical checks
 - Vertices number, data standard, area validation
- Main issue remain with special area profile
- Central verification is the best solution
- Ad hoc group tasked for further action
- All CGs/DCs should continue checking

Circ 1256 revoked - Implementation LRIT system

- CGs Communication of Information to the Organisation
 - List of Authorised ASPs
- Use model letter in annex revised Circ.
- NOA
- CGs issue instructions to masters when reducing reporting rate to 1/24h

Circ 1257 revoked - Shipboard certification

- Compliance conditions completed
 - Type App. Reg V/19.1, TA Reg IV/14, Certified, SSAS
- Model of Conformance test report
- CTR no longer valid when equit."unserviceable"
- Conformance Test should be planned by Administration

Circ 1258 revoked – SAR

- MRCC/RCCs need be instructed
 - Obligation SAR services
 - Processing position request
 - Limitations during phase in
- Budget impact

Overall Outcome

- System setting delayed until mid 2009
- US continue operating IDE until 31/12/2011
- IMSO appointed LRIT Co-ordinator
- Circ 1259 delivered in the coming days
- Setting up Correspondence group
- 1 Ad hoc meeting until MSC 86

Thank you !
