

Capacity Building through Enhancement of Tools

Analysis of the outcome of the pre-workshop
questionnaire

F. Rohling / Sen Project Officer
Unit B3 - Environment and capacity building

Lisbon / 29-30 March 2017

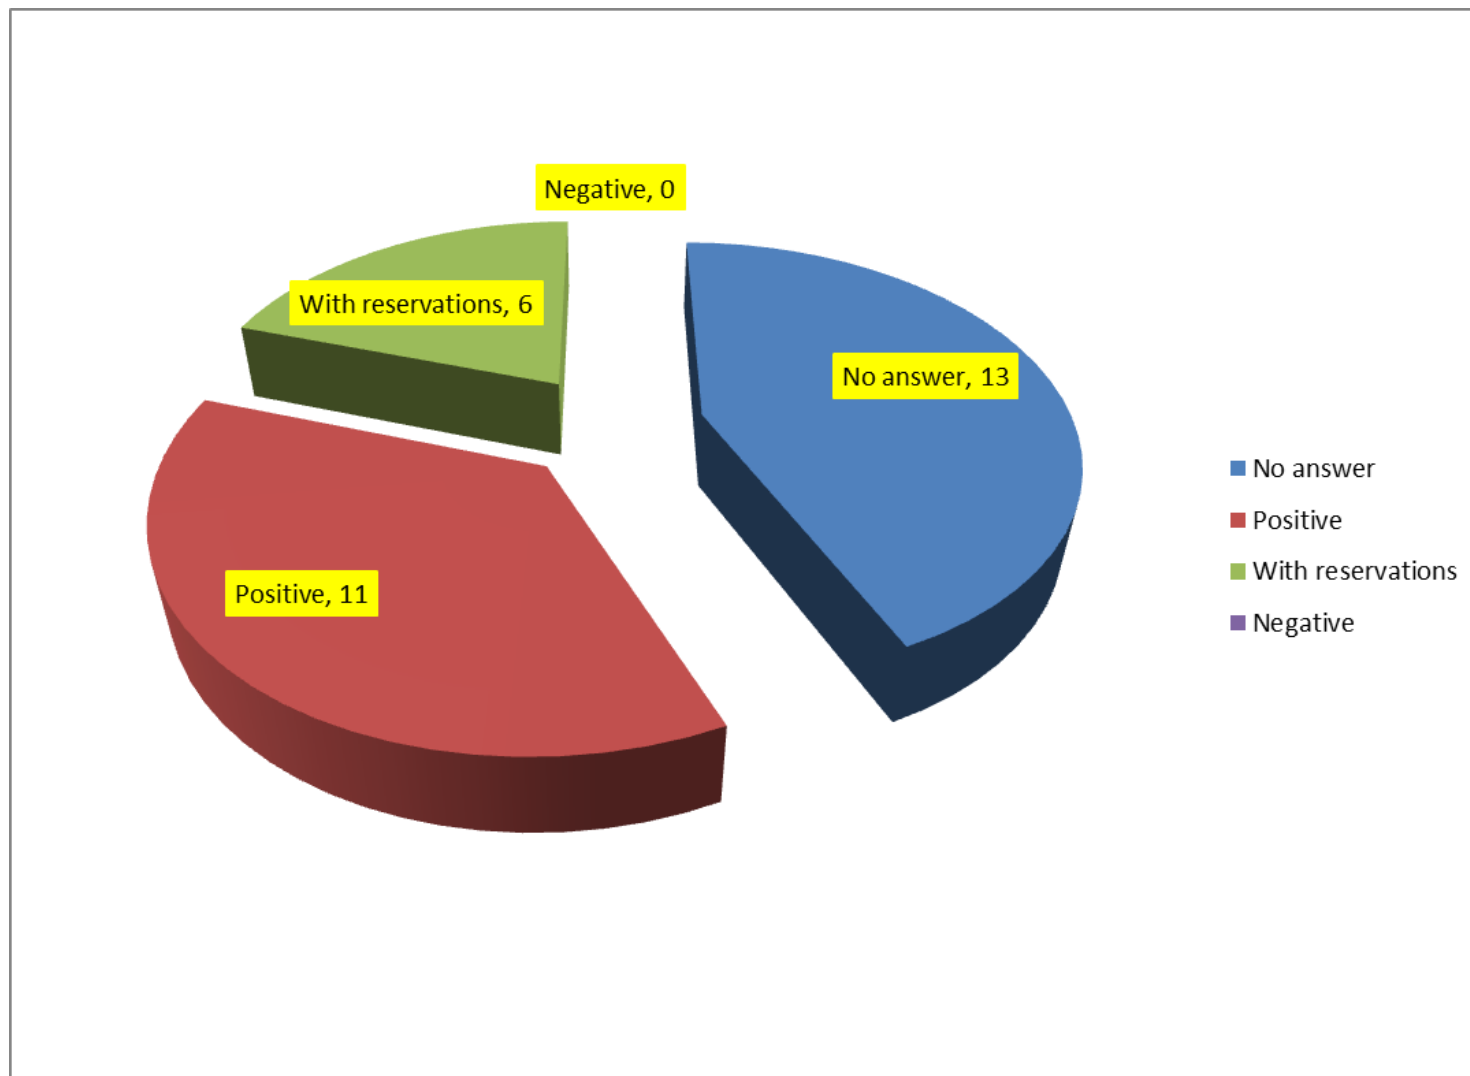

Q1

Please indicate if the proposed enhancement to support the control provisions (beyond those foreseen under Directive 2009/16/EC) foreseen by Regulation **1257/2013 on Ship Recycling** would be of added value

Q2

Taking into account the information above, please indicate **any other data or functionalities** for THETIS-EU that would support the Implementation of EU and International legislation for the prevention of pollution from ships

Q1, proposal for SRR inclusion

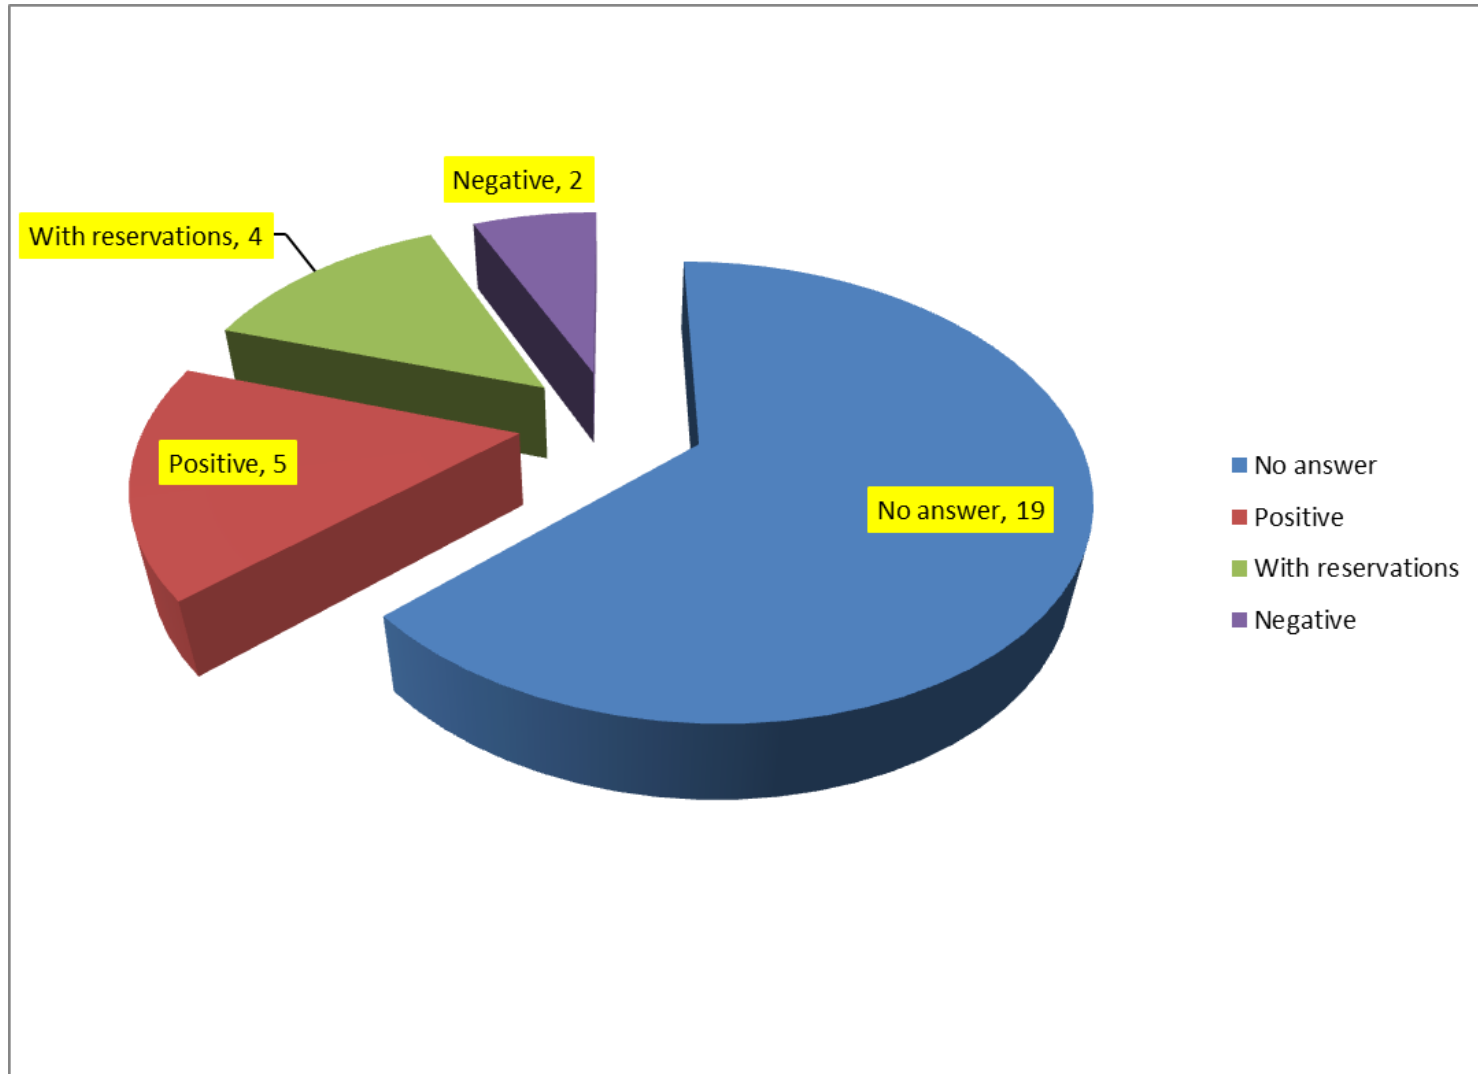

Positive

- It will be of added value
- It will support effective and uniform enforcement
- Risk based approach is helpful and way forward

Cautious or concerned

- Not within competency of respondent
- Difficult to assess from the proposal
- Becomes complex due to added authorities
- Interaction with SSN and legal basis in general to be clarified

Q2, Any other suggestion for inclusion

Proposals

- MRV inclusion
- Statistical information
- STS transfer operations
- Portcall management in THETIS-EU

Cautious or negative

- No need for anything
- Seems comprehensive today
- Targeting functionality is only useful with legal foundation

1. Proposal to include a module to support enforcement of the Ship Recycling Regulation is welcomed in general. *Next agenda point.*
2. Inclusion of a module for MRV enforcement
3. There are no signals towards objection in general
4. Concerns are expressed regarding the legal basis and the use of data from other instruments
5. More management information is requested
6. Increasing complexity
7. Current technical issues need to be addressed
