

# Workshop on Capacity Building – support for Member States in their capacity as Flag States

Joint EMSA-EFCA training/workshop on safety/fisheries  
control rules applicable to fishing vessels

.... / ....

Safety & Standards

Lisbon / 30-31 January 2018

Background information

Action

Expected outcome

EMSA presented an overview of the actions related to capacity building, which were warmly welcomed by the members of the Board.

EMSA organized the first in-house workshop on capacity building  
(March 2017)

A pre-workshop questionnaire circulated to Member States allowed to map the MSs needs in three areas:

Flag State

Port State Control

Environment

## Conclusions of the working group on capacity building - Flag State

A number of MSs expressed an interest in training regarding **fishing**

Some MSs suggested a **joint activity with EFCA** on a possible overview on fisheries control rules in favour of safety inspectors

Since the recent amendment to its founding regulation **EMSA shall cooperate with EFCA and FRONTEX also in the field of capacity building**

EMSA proposed EFCA to evaluate together the possibility to develop a joint training/workshop on fisheries

EMSA received a very positive feedback from EFCA: the joint training is of a certain interesting also for fisheries inspectors

EMSA and EFCA agreed to the outline of the joint training/workshop on safety and fisheries controls rules applicable to fishing vessels

## Non actions (what we will not do)

1. Reinvent a job
2. Take action in the field of responsibility of different Authorities
3. Assignment of new tasks

## EMSA

1. Introduction to the harmonized safety regime for fishing vessels of 24 meters in length and over (life saving and fire-fighting equipment, stability information - DIR 97/70/EC -)

2. STCW-F

3. DIR 200/59/EC on Port reception facilities

4. REG EU 1257/2013 on Ship recycling

5. Torremolinos Convention and Cape Town Agreement

6. EFCA-EMSA cooperation - Service level agreement

## EFCA

1. Introduction to fisheries control and inspection Positive development

2. Identifying fishing vessels and their activities (types of gears/type of fishing vessels)

3. Overview on systems on board fishing vessels (basic principles)

4. Overview on documentation on board fishing vessels (fishing licence, engine power certificate)

5. EMSA-EFCA cooperation – Service level agreement

2 training/workshop are scheduled

4-5 April 2018 at EFCA premises (Vigo)

23-24 May 2018 at EMSA premises (Lisbon)

Target participants: fisheries/safety  
inspectors

## Expected outcome of the EMSA-EFCA joint training/workshop

1. Increase familiarization of safety inspectors with fisheries control rules
2. Increase familiarization of fisheries inspectors with safety rules applicable to fishing vessels
3. Raise awareness on the added value of an effective cooperation between fisheries and safety Authorities
4. Increase cross sectoral cooperation

# The added value of cooperation

# Thank you for your attention
