

ABM workshop 4

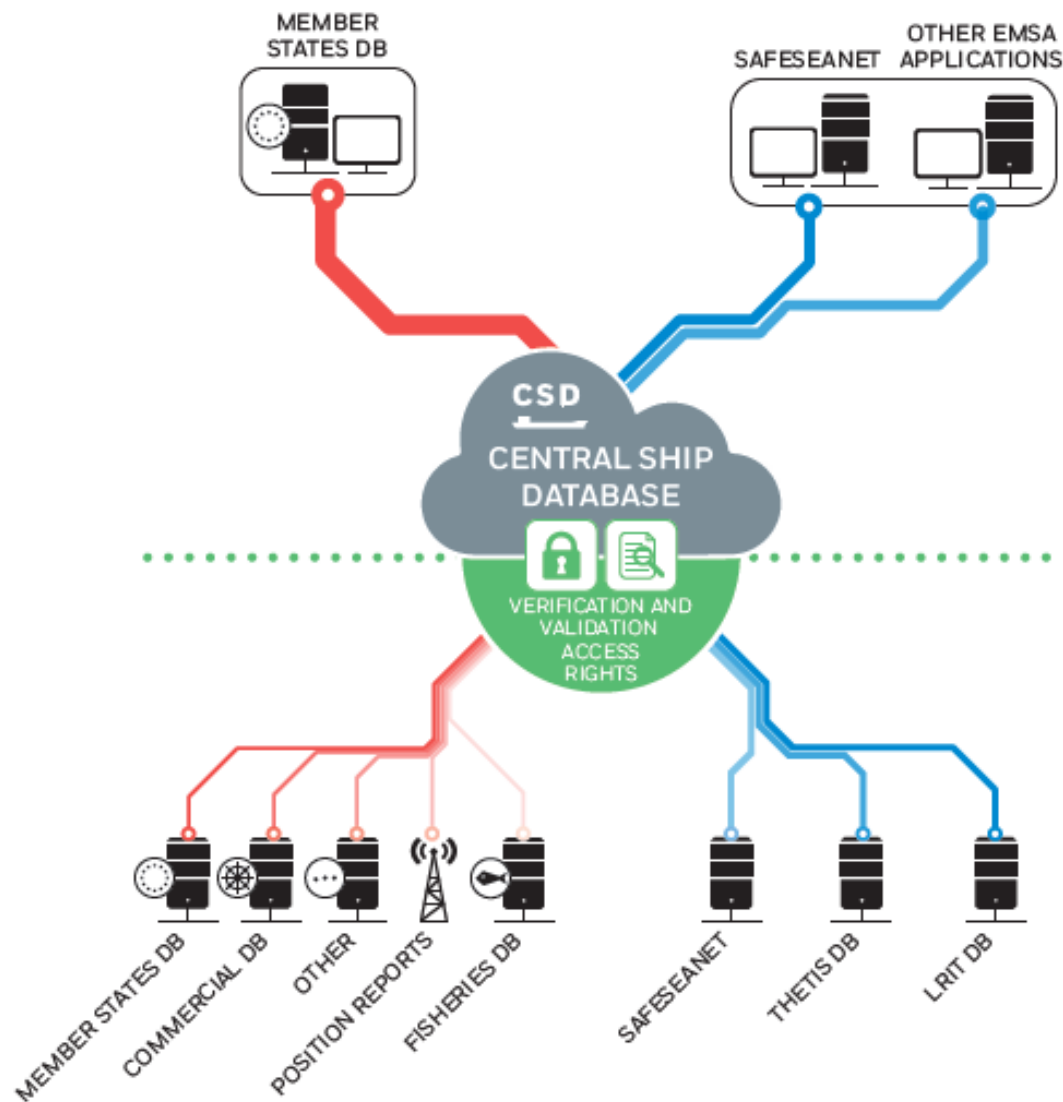

CSD and OVR – progress report

Yann LE Moan

Department C: Operations/Unit C.3.1

Lisbon / 4 December 2018

Current Status

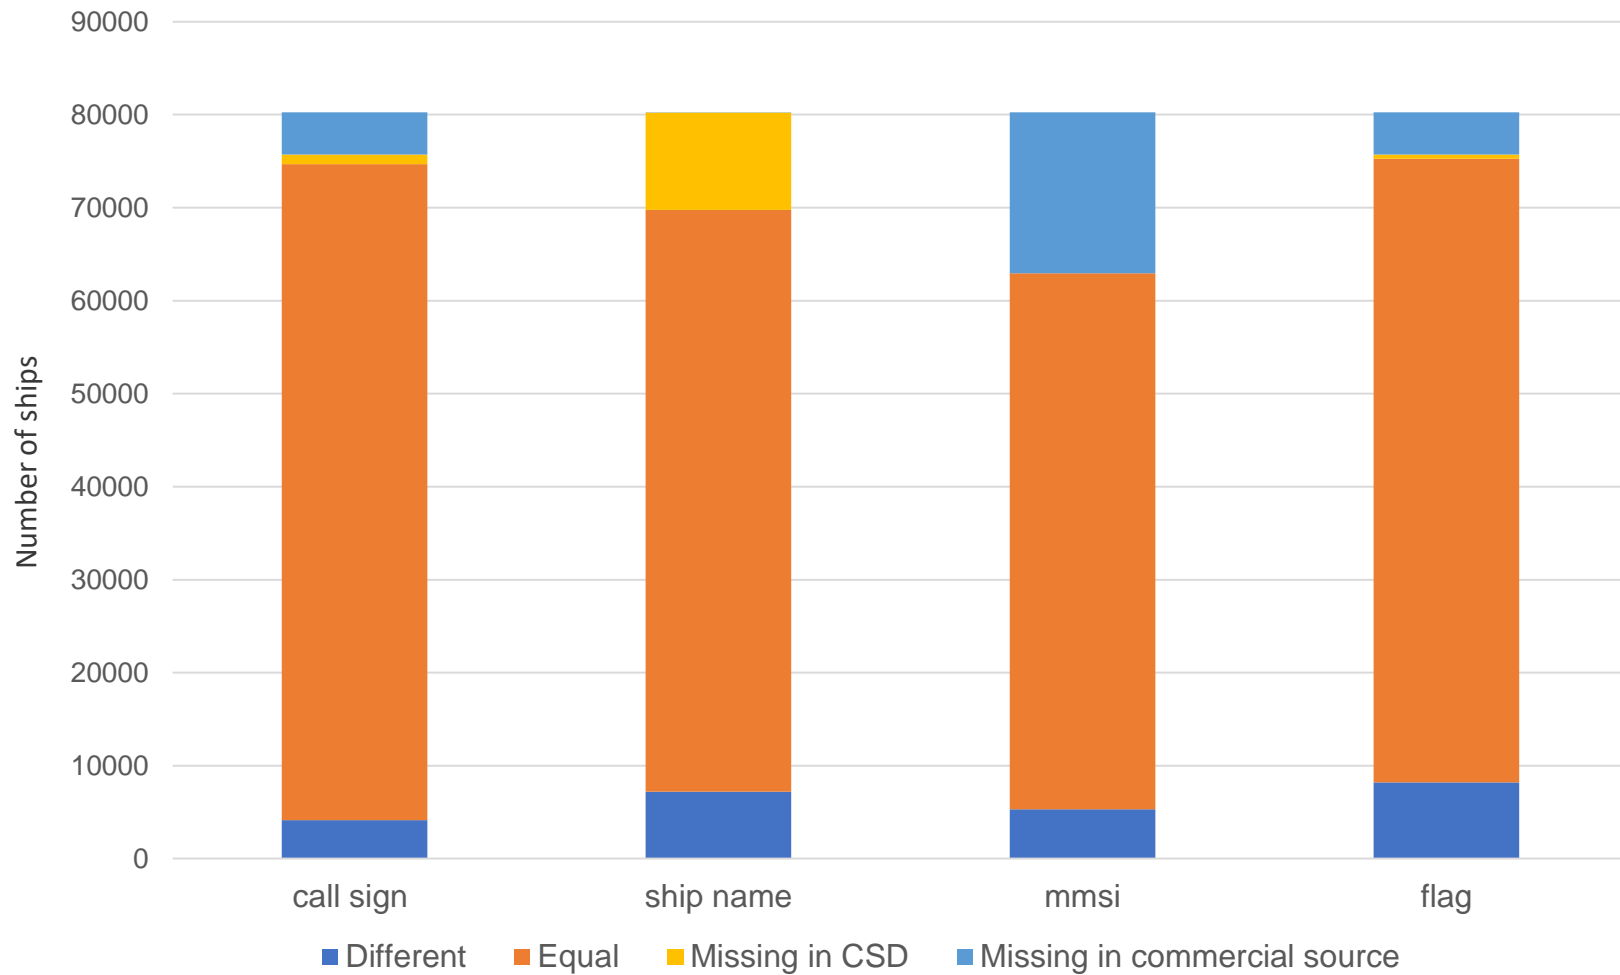

EMSA performs regular data quality analysis and takes measures to improve the overall quality of the CSD e.g. :

- using ship related information from AIS messages cross checked against other sources which allowed to include:
 - 4000 new vessels and
 - update 15,000 records in the CSD last September
- With the support of EFCA, validate and inject fishing vessels in CSD

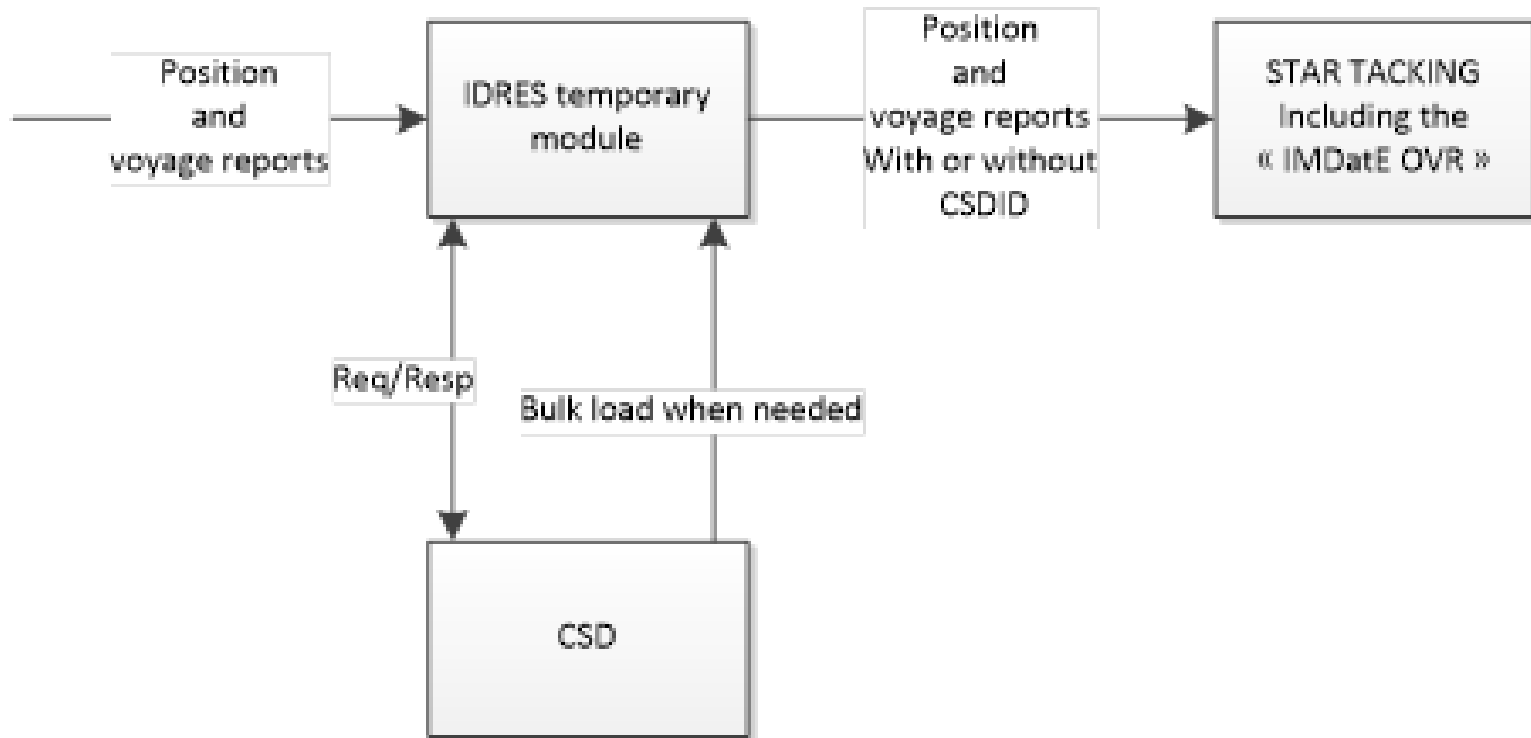

Current Status

CSD vs Commercial Source (October '18)

Improving Operational Vessel Registry using IDRES

IDRES= Identity RESolution

IDRES:

- Preparatory work to synchronise CSD and IMDatE OVR on –going
- Testing in pre-production on going

Should testing considered positive, IDRES will be going in production early 2019.
