

6th SSN LRIT Group Meeting

Enhancement of the Central Ship database pilot project – progress report

Agenda item 6.3.5

Philippe Duchesne / Senior Project Officer
Department C: Operations/Unit C.2.1

Lisbon / 31 October 2019

Funded by the
European Union –
European Maritime
and Fisheries Fund

Background

21 November 2018, EMSA sent an invitation letter to participate in a **pilot project for the enhancement of ship database services**

Pilot project's scope

- Further develop EMSA's Central Ship Database (CSD) services.
- Promote CSD services to Member States.

Participants

11 Member States volunteered: DE, EE, FI, FR, HR, IT, LV, NL, NO, RO, SE.

Current Status – 1st meeting (27/06/19)

The **objective** of the meeting was to:

- Present the pilot project
- Review the situation of each participating country and share experiences
- Discuss the CSD concept in order to define use cases, data sources, business rules and exchange mechanisms

A **questionnaire** was sent before the meeting in order to

- Receive feedback on EMSA's ship database services and
- Learn about the information available at national level

A **concept paper** on the CSD and a **reference data set** were made available to the participants before the meeting.

Current Status – 1st meeting (27/06/19)

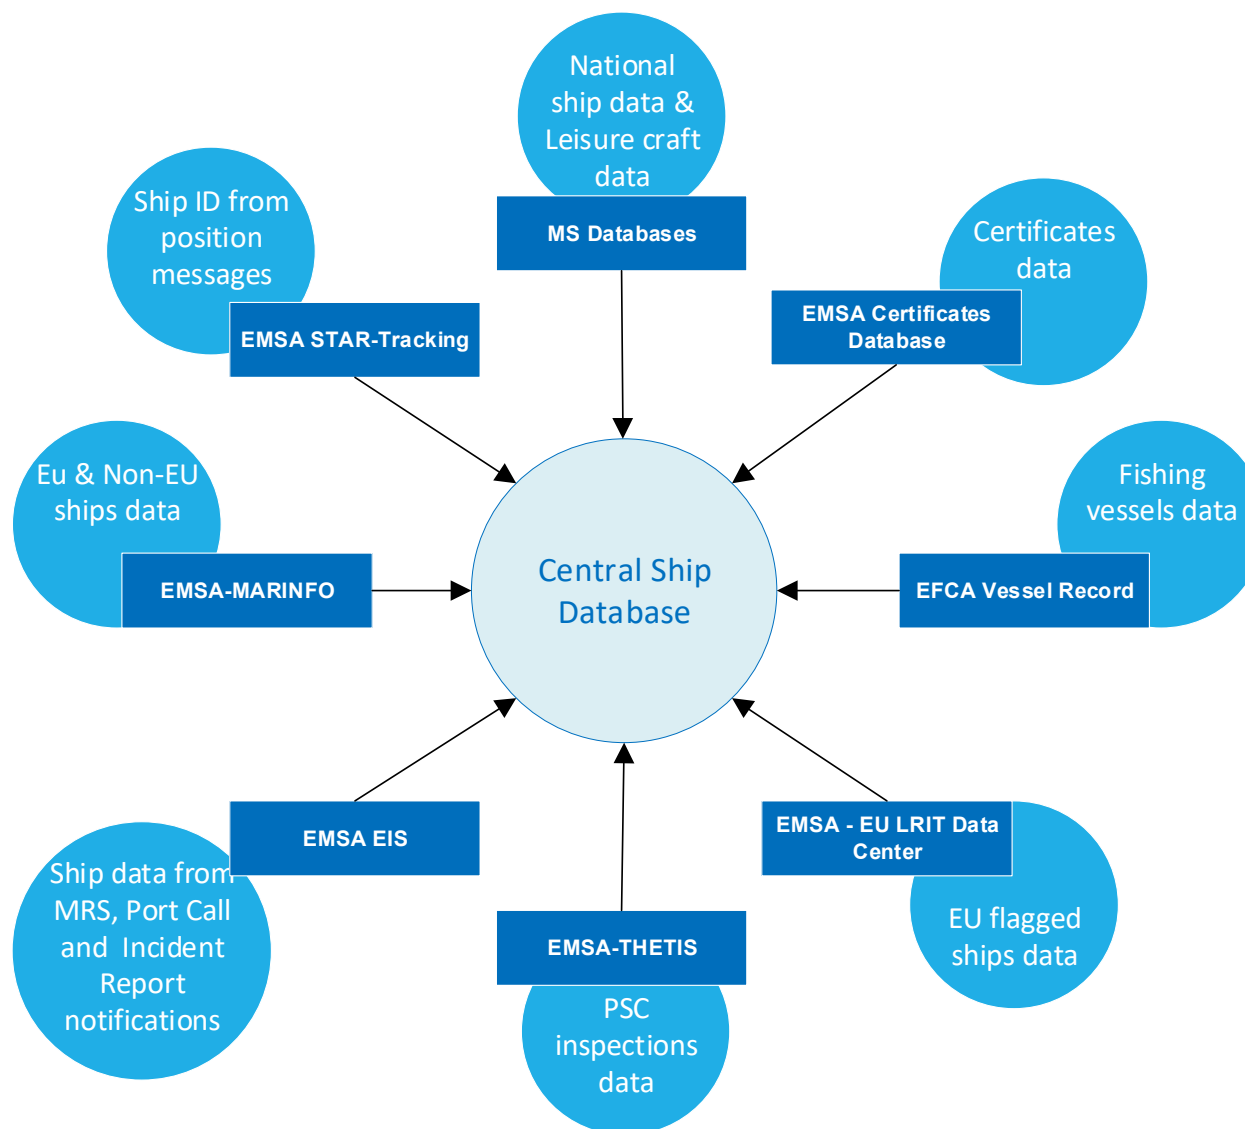

The project participants agreed

- To include information on **merchant shipping, fishing vessels and leisure crafts**
- That information on **ships' statutory certificates** would be assessed
- That **no personal data** should be handled by the system

Information will be collected from:

- The **SSN Ecosystem** (e.g. SSN notifications and ship inspections).
- **EU databases** (e.g. fishing vessels).
- MS national databases: **National flag registers and leisure craft databases**
- **Recognized Organizations and Commercial data products**

Data sources

Current Status – 1st meeting (27/06/19)

The project participants considered that the CSD should handle two levels of confidence

- A level for data controlled by authorities
- Another level for less reliable data sources

A second project meeting will be held to review the system requirements

- Features
- System interfaces
- User interface
