

# Conclusions

## Awareness Campaign Workshop

1

**Lisbon**

**11 February 2010**

## Disclaimer

*This Presentation is continuously updated and corrected where relevant.*

*EMSA assumes no responsibility in older version of slides being used by external parties over which the Agency has no control.*

*Please note that it cannot be guaranteed that what you will see exactly reproduces an officially adopted text. Only European Union legislation published in paper editions of the Official Journal of the European Communities is deemed authentic.*

## Conclusions

- Short time remains!
- Operational and Technical readiness
- Need to support legal process
- Need to coordinate national/international level
- Need to develop individual action plans

## **Summary of considerations for focal points (1)**

- Identify/contact the national PSC authority
- Verify transposition process
- Support adoption of national legislation
- Identify/contact the SSN NCA
- Identify need for legal basis or procedures
- Verify full coverage

## **Summary of considerations for focal points (2)**

- Possibly develop a “national” action plan
- Update EMSA on individual action plan
- Present progress at the next meeting
- Identify need for changes in approach reported
- Update/complete information in questionnaire
- Report to EMSA on a periodic basis

## **Summary of considerations for focal points (3)**

- Evaluate awareness of industry at national level
- Possibly develop a national awareness campaign
- Support distribution of leaflets/information
- Complete the nautical publication's template
- Verify technical implementation
- Support action to ensure readiness
- Periodically update EMSA on technical status

## **Future communications**

- Next meeting around May-June
- Focal points to present progress
