- Important for EMSA to understand how MS use IMS tools & functionalities & what their priorities are.
- Opportunity to share knowledge of operational work and assist EMSA to further develop an IMS service which is **fit for purpose**
- If interested in potentially supporting the IMS team through a NEPT (or a SNE) please let us know...

What is the NEPT programme?

The professional traineeship programme aims to provide NEPTs (National Expert in Professional Training) with experience of EMSAs working methods with regard to Marine Pollution Response, Vessel Traffic Information Systems and EU Maritime Safety Legislation. In-service training enables them to gain practical experience and understanding of the day-to-day work of EMSA and to give them the opportunity to work in a multi-cultural environment, whilst at the same time allowing staff from the National Administrations to put into practice the knowledge they have acquired in their studies.

Please note that NEPTs shall continue to be paid by their employer without any financial compensation from EMSA.

For more information please see: Rules applicable to National Expert in Professional Training

Seconded National Experts

Staff from Public Bodies can work at EMSA as 'Seconded National Experts'. Seconded National Experts are seconded to the Agency while remaining in the service of their national employer and continuing to be paid their national salary by their employer. They receive from the Agency a daily subsistence allowance per calendar day for the duration of their secondment. Therefore, candidates for a SNE post must be supported by their national authorities.

The Agency uses National Experts in the technical areas where advanced experience is available in National Administrations (e.g. Port State Control). At the same time, the exchange of expertise through Seconded National Experts contributes to the development of effective and smooth working relationships between Member States' maritime administrations and EMSA.

 **Important:** Your application for a secondment to EMSA must be submitted by the Permanent Representation of the Member State that intends to second you.

Please, [click here](#) to get the list and links to the different Permanent Representations to the European Union.
