Report on Budgetary & Financial Management

A. Legal Framework – Accrual accounting standards in EMSA

The 2010 EMSA financial statement has been established by using the consolidation package provided by the European Commission. The accounting rules and regulations used in this report and stipulated by the European Commission are on an accrual basis and are compliant with the International Public Sector Accounting Standards (IPSAS).

B. Accounting Information System (ABAC/SAP and related softwares)

Throughout 2010, EMSA has reinforced its financial systems by using:

- **ABAC Assets** for managing anti-pollution equipments.

The anti-pollution equipments representing more than 2/3 of the total balance sheet at the end of 2010, it was of the highest importance to implement this module to track and manage the most valuable items of the Agency.

Originally managed in a local excel inventory system, all anti-pollution items (and boat pre-fitting investments) have been transferred to ABAC by the Department for Operations last December 21.

- **SAP/HighDeal billing system.** This has been implemented to follow and control all costs related to LRIT messages (> 40.000 billable messages per day). This system is the backbone of the EMSA “fees and charges” system and was chosen for its references in the telecom industry (the closest possible industry for LRIT). For integration purposes, the acquisition of HighDeal by SAP is positive news for the overall EMSA financial system, since the core module of ABAC is SAP. Following one year of production status, the system has been validated by the Accounting Officer as requested by the EMSA Financial Regulation (art. 44 EMSA Financial Regulation).

C. Budget execution

As usual, the Anti-Pollution Measures (chapter 38 of the budget) have been the main driver of success by representing more than 38% of the total budget of the year in commitment appropriations. The outcome of the anti-pollution tenders has been highly positive and 99.1% of the related budget 2010 was committed by year end. The remaining operational budget was committed up to 93%.

Global 2010 budget execution for the credit of the year is:

Commitment appropriations – credits of the year (C1):

Title	Budget 2010 (COM)	Realised 2010 (COM)	%
I Staff	19.100.000,00	18.889.164,87	99%
II Administrative exp.	3.578.248,00	3.424.538,07	96%
III Operational exp.	10.680.595,44	9.968.186,40	93%
Anti-Pollution Measures	20.500.000,00	20.329.965,62	99%
Total	53.858.843,44	52.611.854,96	98%

Payment appropriations - credits of the year (C1):

Title	Budget 2010 (PAY)	Realised 2010 (PAY)	%
I Staff	19.100.000,00	18.689.919,95	98%
II Administrative exp.	3.578.248,00	2.911.997,34	81%
III Operational exp.	9.903.809,44	8.245.299,10	83%
Anti-Pollution Measures	17.500.000,00	14.534.489,07	83%
Total	50.082.057,44	44.381.705,46	89%

Regarding Title III and Anti-pollution Measures, both managed under a differentiated appropriations scheme, € 14.480.307,10 of credits of the year (C1 – payment appropriations) have been necessary to cover carried-over commitments coming from:

2006 (or before):	€ 170.139,00
2007:	€ 3.108.232,57
2008:	€ 4.935.920,60
2009:	€ 6.266.014,93

	€14.480.307,10

Due to their budgetary size, the multi-annual component and the differentiated appropriation mechanism chosen, the Anti-pollution Measures are subject to specific and close financial monitoring by the Agency.

In comparison with 2009, 2010 budget execution figures are better for both commitment appropriations and payment appropriations.

The following key figures support this statement:

Commitment appropriations – credits of the year (C1) – evolution 2009-2010

Title	2009	2010	Evol.
I Staff	90%	99%	+9%
II Administrative exp.	95%	96%	+1%
III Operational exp.	88%	93%	+5%
Anti-Pollution Measures	99%	99%	0%
Total	94%	98%	+4%

For commitment appropriations, the global improvement (+4%) came from almost all sectors with a particularly outstanding performance in Title I (Staff exp.).

Payment appropriations – credits of the year (C1) – evolution 2009-2010

Title	2009	2010	Evol.
I Staff	89%	98%	+9%
II Administrative exp.	62%	81%	+19%
III Operational exp.	78%	83%	+5%
Anti-pollution Measures	78%	83%	+5%
Total	81%	89%	+8%

For payment appropriations, the global improvement (+8%) came from all sectors with a particular performance in Title II (Administrative exp. +19%).

Due to the overall excellent performance in payment, the amount of credit transferred from 2010 to 2011 (€ 1.214.272,92) to cover unpaid commitments at year end is 43% lower than the year before (€ 2.113.480,28).

This performance helps us to better meet the concept of “annuality of the budget”.

D. Conclusions

Eight years after the launch of the Agency, it is useful to note that EMSA budget execution (both in commitments and payments) has been gradually increased by approximately 5-10% per year to reach its current level.

Based on the experience of comparable European Agencies or Institutions where major calls for tender are organised and important pre-financing is given, EMSA has reached “financial maturity” with a budget execution of >95% in commitment appropriations and 89% in payment appropriations.

While managing the financial resources of Anti-Pollution Measures will remain a critical business factor for EMSA, it must be noted that the LRIT “fees and charges” and its related income model has considerably modified the level of accounting complexity of the Agency.

To strengthen control of the supply chain (particularly in the operational area), EMSA is still considering a possible extension of the use of ABAC SAP via the implementation of its Material Management module (DG BUDG project “Supply and Asset Management - SAM”). If jointly decided with DG BUDG during the second half of 2011, this project shall considerably strengthen control of procurement and would bring the benefit of a SAP integrated solution without having to bear the important costs of a local SAP implementation.
