

ACCIDENT INVESTIGATIONS

Shipping accidents happen. And when they do, accident investigation can help identify problems, and to learn lessons that may prevent accidents in future. EMSA manages the EU's EMCIP database for sharing marine accident investigation information, and is helping to improve

PROTECTING THE MARINE ENVIRONMENT

EMSA provides ships to help Europe better respond to major oil spills, satellite images to identify polluting vessels, and ensures ships comply with environmental rules. The Agency's marine environmental expertise covers areas such as ballast water management, port waste reception facilities and anti-fouling coatings for vessels.
