

SSN Workshop 14

Lisbon 20-21 October 2010

Access to SSN Graphical Interface

New users

1

Document SSN 14/5/3

CoU -Background

- Nearly all MS have signed CoU (except IRL, UK and FR and Malta that are in the process)
- Objectives of the CoU:
 - To guarantee reciprocity between AIS data requesters and data providers;
 - To apply to the SSN GI, the same access rights rules as applied to the SSN EIS;
 - To regulate the limitations in the use of the electronic charts distributed to the MSs through the web;
 - To identify the initial two users of SSN which have access to SSN via the GI.

Additional access via the GI

- For additional “VTMIS classical users”
- FOR LRIT users
- For new users in the “other types/categories”

Objectives

- Give access through the GI to more than the 2 initially agreed users in the CoU
- Register better the authorization at the NCAs level (without requiring an amendment to the CoU for each update)
- Guarantee that requests for access to the GI interface refer to users already created in by the NCA as SSN users (by requiring the SSN UserId).
- Distinguish those users that can have access to the LRIT flag information in the GI

Access to SafeSeaNet GI Request form	
Country	
Request number	
Name of user requiring access to the SSN GI ¹	
SSNUserId	
LRIT UserId ²	
IP Address(es)	

Signature(s):

Date/Place:

SSN NCA

Name.....

Institution/organisation.....

Please return this form completed and signed to:
Unit C,2 Vessel Traffic and Reporting Services
European Maritime Safety Agency
Cais do Sodré, 1249-206 LISBON, Portugal
FAX: 00.351.211208217

This request form is signed on behalf of EMSA by:

Name:

Position:

Signature and date:

¹ The user requesting access to the SSN GI should be already registered by the NCA as an SSN user in the management console and have an SSN UserId.

² This information is necessary only for users authorised by the NCA to have access to LRIT reports.

Signature and date:

¹ The user requesting access to the SSN GI should be already registered by the NCA as an SSN user in the management console and have an SSN UserId.

² This information is necessary only for users authorised by the NCA to have access to LRIT reports.

CoU and proposed form only necessary until 2011 when...

- SSN upgrades allow :
 - NCAs to administrate the management of access rights to the Graphical interface directly in the management console without intervention of EMSA.
 - To avoid the need for filtering the IP addresses for security purposes.
 - To introduce in the system itself an acceptance procedure for the copyright clauses of the charts.
- EMSA purchases additional nautical charts licences to cover all potential new users.
- The IFCD includes the GI in the description of the SSN system

Thank you
