

SSN Group meeting 24

SSN XML Reference Guide v3.03

Agenda item 24.4.2

Marta Lima Galvão / **Senior Project Officer**
Department C: Operations/Unit C.2.2

Lisbon / 14 October 2015

- **XML Reference Guide v3.02 includes the new SSN V3-related messaging framework for:**
 - PortPlus notifications and ShipCall requests/responses
 - Ship MRS notifications and requests/responses
- **SSN V3 foresees a progressive implementation by national SSN systems extended until December 2015**
(decision taken at HLSG 13)
- **Central SSN system must support the exchange of information in line with the two versions of the XML Reference Guide (v2.08 and v3.02)**

XML Reference Guide draft version 3.03:

- ▶ several editorial corrections were identified during the Member State commissioning tests, mainly to align the XML RG with the message schema (no impact on the XSD files)
- ▶ non-technical amendments to the XML RG V3 in order to align with the SSN Guidelines on Reporting HAZMAT (approved by HSLG 13)
- ▶ port facility generic code “0000” to cover cases where port facilities have not been ISPS-approved, or where they have been recently approved, but still not included in the GISIS (Norway, SSN 23.6.2)
- ▶ **Planned date: following SSN 24 approval**

XML Reference Guide draft version 3.04 – additional changes approved at SSN Group 23 (with impact on the associated schema files):

- alignment of rules relating to PortPlus validation for cases where there are long stays in port of more than 1 year (action point 9)
 - change of the control of “ETDFromPortOfCall” in PortPlus notifications (France, SSN 23.6.1)
 - correction of the business rule relating to the provision of the UN Number and IMO Hazard Class in cases where the DPG item is type IGC (France and HAZMAT WG)
- **Planned date: SSN v3.2 – February 2016**

Member States are invited to:

- review and approve the new version of the XML RG v3.03 document
