

7th SSN/LRIT Group Meeting Incident Reporting Working Group - draft proposals

Agenda item 7.3.3

Marta Lima / Senior Project Officer
Department 3: Digital Services and Simplification

Video conference / 13 May 2020

Working Group on “Incident Reports” (IRWG) was re-establish by HLSG DM 4 (Dec. 2018)

- Following feedback received from Pollution Response Authorities and SSN users, there is a need to further improve/correct some features and align with operational procedures
- **Objective: to further improve reporting and exchange of Incident Reports through SafeSeaNet and CECIS MP, for the POLREP in particular**
- 11 Member States volunteered to participate representing both the SSN user community and the Pollution Response Authorities: Belgium, Denmark, Malta, Norway, the Netherlands, Poland, Portugal, Romania, Slovenia, Spain, and Sweden.

Current status

- **1st meeting of the IRWG (19 June):** discussed the revision of the business processes in SSN for IR submission, access to IR information and exchange of IR information and propose improvements to the IR structure and the SSN web interface
- **2nd meeting of the IRWG (12 November):** concluded the work on Business Requirements and proposed improvements to IR Guidelines
- The Working Group is now finalising the Incident report Guidelines through correspondence
- The IRWG proposals are being submitted to the SSN Group for additional comments:
 - IRWG Business Requirements
 - Draft Incident Report Messages Guidelines

Member States are invited to provide feedback to the proposals by end-May

- **IRWG proposals** will also be submitted to the CTG MPPR per correspondence for any comments.
- Following the comments received, EMSA will circulate the final versions to the **SSN Group and the CTG MPPR for validation**
- Final documents to be submitted to the next HLSG for approval.
