

## Agenda: Training on Port facility pollution contingency planning for the Jordan Commission - online

Learning objectives: at the end of the training, trainees should be able to identify, describe, explain, and discuss the process of Contingency Planning concerning:

- the elements needed in a contingency plan;
- the assessment of the risk to the waters and coast that the contingency plan covers; and,
- the methodology through which the contingency plan will be initiated; and,
- identification of the chain of command and who is responsible for which actions during an actual incident;
- identification of the equipment needed to address the risk addressed in the contingency plan,

The training is addressed to policy officers and harbour employees with the responsibility for, or who have a role in incident response in Jordan. People with no maritime related experience may have difficulties in following the presentations and understanding the case studies.

- The training sessions include on-line presentations and case studies.
- A pdf copy of the presentations should be distributed to the participants in advance before commencing the course.
