

# **1<sup>st</sup> SSN Technical Working Group (WGT1)**

## **EMSA working plan for PSC messages implementation into SSN**

1

**SSN/WGT/01/02**

**The Hague, 18 February 2009**

**Pursuant to the recent recast of the PSC Directive, additional information (such as the Actual Time of Arrival (ATA) and the Actual Time of Departure (ATD) of any ship calling at EU ports and anchorages) have to be transferred by MSSs to THETIS through SSN**

2

**The new requirements will come into force on the 1<sup>st</sup> January 2011, which means also that data exchange between MSSs, SSN and THETIS shall be implemented by that date**

## **EMSA has drawn up an action plan to analyse the tasks and define the relevant timetable following five phases**

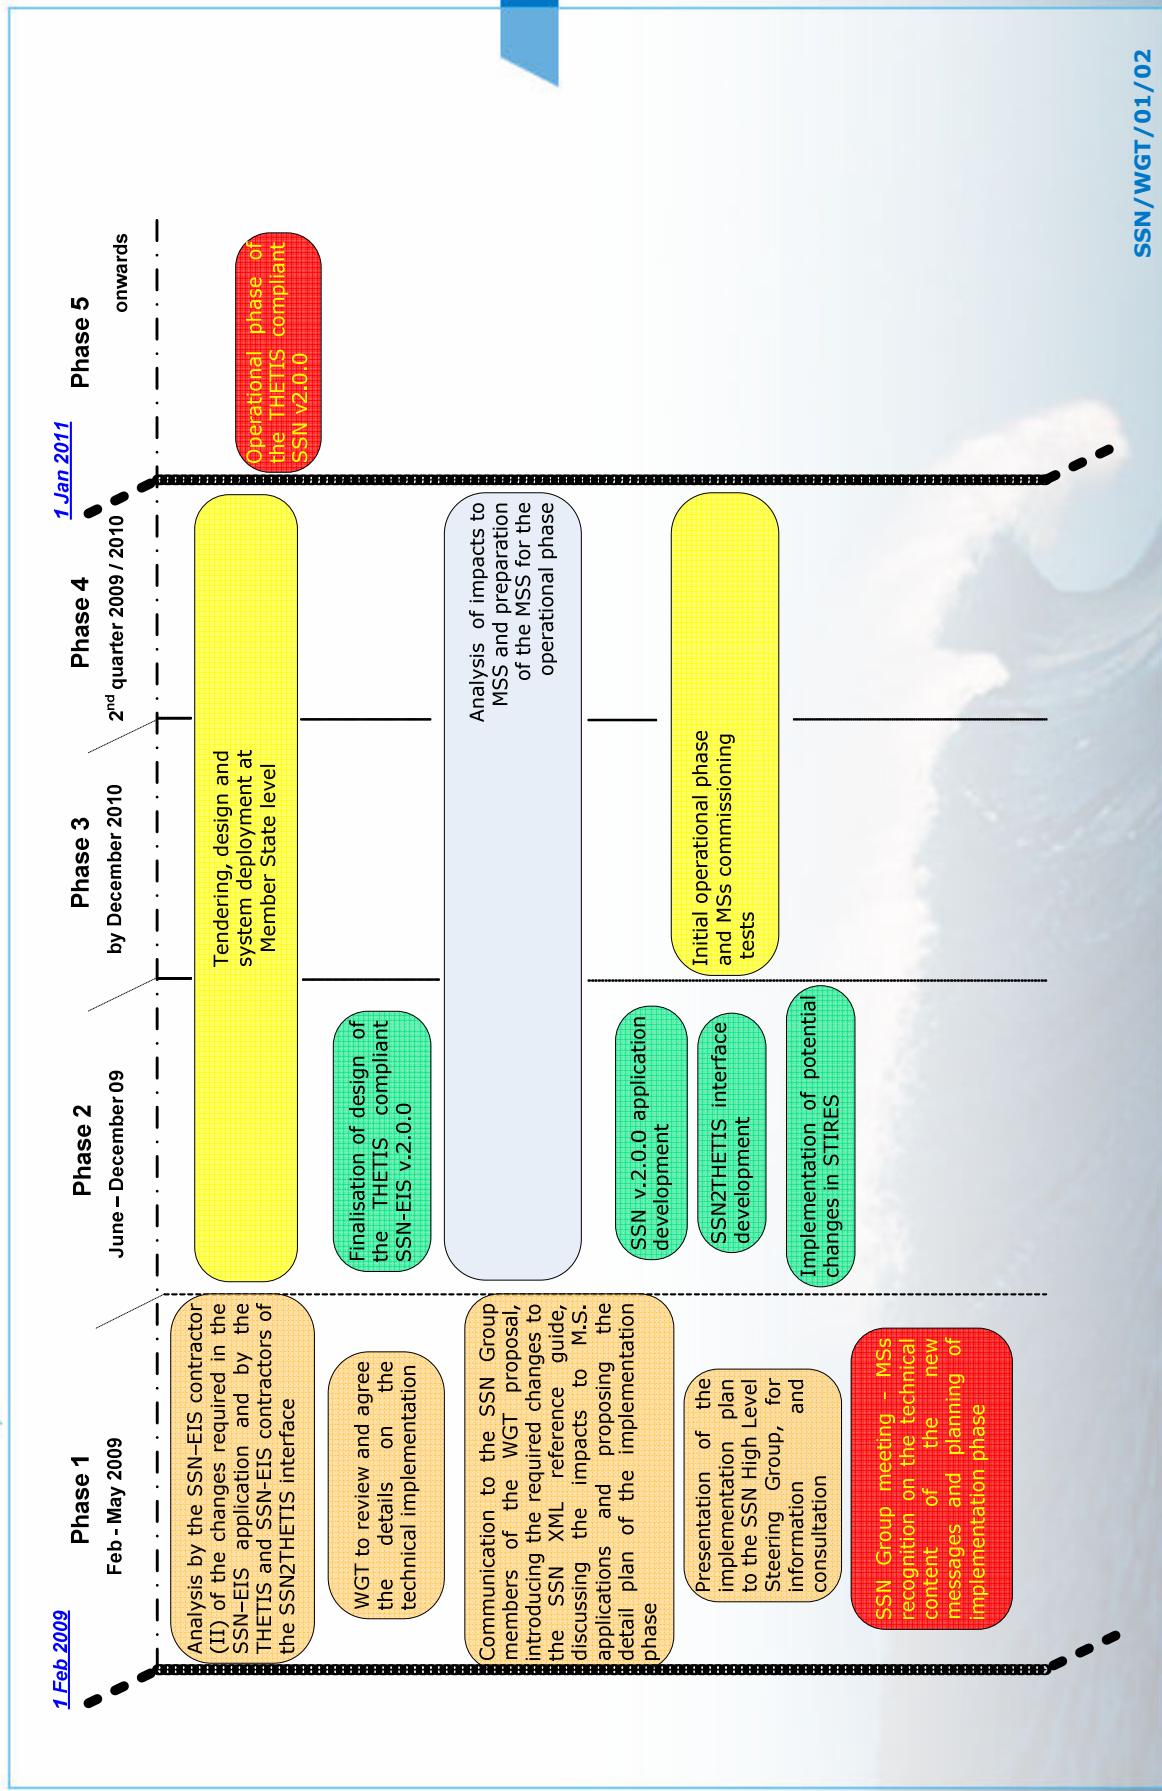

**Phase 1: Preparatory phase (Jan./ May 2009)**

**Phase 2: Core system development and pilot testing (June/Dec. 2009)**

**Phase 3: Implem. at MSs level (2<sup>nd</sup> quarter '09 - 2010)**

**Phase 4: Analysis of impacts and preparation of the MSS for the operational phase (2<sup>nd</sup> quarter 2009/ 2010)**

**Phase 5: Operational phase of the THETIS compliant SSN v2.0 (2011 onwards)**

**The SSN Group will be invited to a meeting in May 2009 (sooner than initially expected) to discuss on the WGT proposal for the technical implementation of PSC messages into SSN**

# Thank you for you kind attention

## ¿ Any Question ?
