

P2 – Plans/Certificates- Chat box

Parallel session

Yann LE Moan Senior Project Officer
Digitalisation and Application
Development, Unit C.4

Lisbon, 18.05.2017

- 1. Digitalised plan in IMS (UCM 8 action 4 as document IMS 9.6)**
- 2. Ships certificates in IMS**
- 3. Chat box functionality (proposal UCM 8 action 5)**

Concept and benefits

- From BE users/discussed at Hazmat WG
- GA plans very useful when responding to various emergencies
- Available in database: reduce delivery time

Legal background, limitations

- MSC/Circ.1135: GA plans on board
- Belong ship owners - property rights – not disclosed to unauthorized users

Potential pilot project

- Short - mid-term: Proof of Concept in SEG
- upload GA plans per specific ship, as well as storing and sharing them with the registered users
- The download of the plans: 'property/copy rights statement'

Initial phase:

- Belgian maritime authority liaised with representatives of ship owners
- EMSA received 15 GA plans and uploaded them in SEG.

Feedback on the functionality in place?

Interest in accessing the service?

Interest/possibility in Providing plans?

Access rights & pre-condition to access the service?

Discussion with Finland

- Certificates available PDF in FI NSW
- For Ships to whom 2010/65 apply and are bound to Finland - Custom requirement
 - Tonnage certificate
 - Certificate of nationality
 - Certificate of Classification
 - Load line certificate
 - Security certificate
- Collection of certificates started in June 2012 (thousands of certificates stored)

Next steps

- Discussion in Fin for assessing if possible to share NSW certificates via SEG
- FOR EMSA, it would required SEG developments

Operational needs in accessing the certificates?

If yes:

- Use cases?
- Which ones?
- Which format?

Possibility to provide certificates? If yes:

- Which ones?
- Which format?

Discussion last UCM 8 to continue

Operational needs?

If yes provide use cases

Should we have the possibility to attach document to this event?

Should handle phone conversation?

Should handle video ?

How many users max per event?

Access rights & pre-condition to access the service?
